The Presidency and Education Kenneth W. Thompson, 1990 *American Presidents and Education* Maurice R. Berube, 1991-06-30 The role of the president of the United States in regard to education changed significantly following the end of World War II As the U S economy became more sophisticated and the country emerged as the dominant technological and world power the demand for an educated work force increased In this work Maurice R Berube offers the first comprehensive analysis of the involvement of American presidents in educational policy tracing the efforts of administrations from Washington to Bush and chronicling the national and international pressures to shape educational policies that have characterized the post World War II era Berube s work takes the form of a policy study as he analyzes presidential programs in education the reasons for their implementation and their correlation to national educational outcomes Beginning with the birth of the presidency he examines successful programs that had a considerable impact and less successful efforts that were significant either ideologically or as forerunners of future policies The constitutional constraints of the president s role in education are explored as well as recent developments including the corporate presidency and the rhetorical presidency Among the other issues addressed are education and the economy and the federal and state constitutions views of a right to education This work will be a unique and valuable resource for students of presidential history the politics of education and contemporary issues in education as well as an important addition to public and academic library collections **The White House and Education through the Years** M. Education and the Obama Presidency, 2009 [The President's Education Summit with Governors](#), 1989 **The Politics of Structural Education Reform** Keith A. Nitta, 2008-01-07 Education policymaking is traditionally seen as a domestic political process The job of deciding where students will be educated what they will be taught who will teach them and how it will be paid for clearly rests with some mix of district state and national policymakers This book seeks to show how global trends have produced similar changes to very different educational systems in the United States and Japan Despite different historical development social norms and institutional structures the U S and Japanese education systems have been restructured over the past dozen years not just incrementally but in ways that have transformed traditional power arrangements Based on 124 interviews this book examines two restructuring episodes in U S education and two restructuring episodes in Japanese education The four episodes reveal a similar politics of structural education reform that is driven by symbolic action and bureaucratic turf wars which has ultimately hindered educational improvement in both countries
