President Kalam at Crossroads Rameśa Guptā, 2003-01-01 A Biography Of The Present Indian President

Globalisation at the Crossroads Sawalia Bihari Verma, Yogesh Upadhayay, Anil Kumar Bajpai, 2008 **Indian Water Policy at the Crossroads: Resources, Technology and Reforms** Vishal Narain, Annasamy Narayanamoorthy, 2016-01-12

This book reviews and analyzes emerging challenges in water policy governance and institutions in India. Recent times have seen the contours of water policy shaped by new discourses and narratives; there has been a pluralization of the state and a changing balance of power among the actors who influence the formulation of water policy. Discourses on gender mainstreaming and Integrated Water Resource Management (IWRM) are influential though they have often remained rhetorical and difficult to put into practice. Debate over property rights reform and inter-linking of rivers has been polarized. At the same time, there has been a rising disenchantment with policy initiatives in participatory irrigation management, cleaning up of water bodies and pollution control. Fast depletion of groundwater resources and the importance of adopting new irrigation methods are getting increased focus in the recent policy dialogue. The contributors review current debate on these and other subjects shaping the governance of water resources and take stock of new policy developments. The book examines the experience of policy implementation and shows where important weaknesses still lie. The authors present a roadmap for the future and discuss the potential of alternative approaches for tackling emerging challenges. A case is made for greater emphasis on a discursive analysis of water policy to examine underlying policy processes. The contributors observe that the ongoing democratization of water governance coupled with the multiplication of stresses on water will create a more visible demand for platforms for negotiation, conflict resolution and dialogue across different categories of users and uses. Finally, the authors propose that future research should challenge implicit biases in water resources planning and address imbalances in the allocation of water from the perspectives of both equity and sustainability.

Kashmir at the Crossroads Sumantra Bose, 2021-12-07 An authoritative, fresh and vividly written account of the Kashmir conflict from 1947 to the present. The India-Pakistan dispute over Kashmir is one of the world's incendiary conflicts. Since 1990, at least 60,000 people have been killed: insurgents, civilians and military and police personnel. In 2019, the conflict entered a dangerous new phase. India's Hindu nationalist government under Narendra Modi repealed Indian-administered Jammu and Kashmir's autonomous status and divided it into two territories subject to New Delhi's direct rule. The drastic move was accompanied by mass arrests and lengthy suspension of mobile and internet services. In this definitive account, Sumantra Bose examines the conflict in Kashmir from its origins to the present volatile juncture. He explores the global context of the current situation, including China's growing role, as well as the human tragedy of the people caught in the bitter dispute. Drawing on three decades of field experience in Kashmir, Bose asks whether a compromise settlement is still possible given the ascendancy of Hindu nationalism in India and the complex geopolitical context.
