Stepping Away Lisa Jasinski, 2023-07-14 In no other professional field do senior leaders habitually return to the rank and file workforce in the twilight of their careers Corporate CEOs rarely conclude their working

lives by resuming the duties of a mid level account executive on the verge of retirement four star generals do not return to the infantry But in academia former senior leaders often conclude their careers by reprising the roles and responsibilities of a professor Until now leaders and institutions have been left to navigate these transitions on their own often learning hard lessons that might have been avoided Stepping Away moves beyond the well worn clichés of stepping down to examine how senior leadership role changes impact individuals and the institutions they serve Drawn from empirical research involving more than fifty college presidents provosts and deans this book delivers fresh understanding of the challenges and opportunities leaders face as they assume a new place in the social architecture of their campus Bridging the gap between theory and practice Stepping Away translates research into practical strategies that leaders can use to make this change successfully providing guidance about when to speak up and when to remain quiet how to develop new relationships where to office whether to apply for new jobs and how to use their knowledge and skills to add value to their campus communities on campus and off

Wooten, Jacob Babb, Brian Ray, 2018-04-23 *WPAs in Transition* shares a wide variety of professional and personal perspectives about the costs, benefits, struggles, and triumphs experienced by writing program administrators making transitions into and out of leadership positions. Contributors to the volume come from various positions as writing center directors, assistant writing program administrators, and WPAs in mixed settings including community colleges, small liberal arts colleges, and research institutions, and a range of career stages from early to retiring. They recount insightful anecdotes and provide a scholarly context in which WPAs can share experiences related to this long-ignored aspect of their work. During such transitions, WPAs and other leaders who function as both administrators and faculty face the professional and personal challenges of redefining who they are, the work they do, and with whom they collaborate. *WPAs in Transition* creates a grounded and nuanced experiential understanding of what it means to navigate changing roles, advancing the dialogue around WPAs and other administrators' identities, career paths, work-life balance, and location, and is a meaningful addition to the broader literature on administration and leadership. Carbon neutrality, renewable energy sources, green building strategies, and related initiatives require informed and courageous leaders at all levels of higher education. James Martin and James E. While almost seven hundred chief executive officers have signed the American College and University Presidents' Climate Commitment, several thousand have yet to do so. This book identifies four of the most formidable challenges facing these presidents and leadership teams, along with solutions to address them effectively: institutionalizing sustainability thinking; developing an efficient, flexible system of sustainability benchmarks; implementing an accountable university budget model; and engaging boards of trustees in the campus sustainability agenda. Smelser, 2013-03-15 This book is an expanded version of the Clark Kerr Lectures of 2012 delivered by Neil Smelser at the University of California at Berkeley in January and February of that year The initial exposition is of a theory of change labeled structural accretion that has characterized the history of American higher education mainly but not exclusively of universities The essence of the theory is that institutions of higher education progressively add functions structures and constituencies as they grow but seldom shed them yielding increasingly complex structures The first two lectures trace the multiple ramifications of this principle into other arenas including the essence of complexity in the academic setting the solidification of academic disciplines and departments changes in faculty roles and the academic community the growth of political constituencies academic administration and governance and academic stratification by prestige In closing Smelser analyzes a number of contemporary trends and problems that are superimposed on the already complex structures of higher education such as the diminishing public support without alterations of governance and accountability the increasing pattern of commercialization in higher education the growth of distance learning and for profit institutions and the spectacular growth of temporary and part time faculty
