Presidents from Adams through Polk, 1825-1849 David A. Smith, 2005-06-30 It was the Era of Good Feelings but all was not well with the young Republic. From 1825 to 1849 presidents John Quincy Adams, Andrew Jackson, Martin Van Buren, William Henry Harrison, John Tyler, and James K. Polk grappled with the legacy of the Monroe Doctrine, Indian removal, territorial expansion, the National Bank, tariffs, economic depressions, War with Mexico, near war with Great Britain, and the place of slavery in the growing nation. As one would expect from confident citizens of the burgeoning young country, conflicting arguments swirled around the hot button issues of the day. This rich resource of primary documents enables students to read these arguments first hand and feel the passions and study the logic driving their often forceful positions. All of the primary documents are annotated and placed into historical context. A thorough index concludes the work.

Presidents from Hayes through McKinley, 1877-1901 Amy H. Sturgis, 2003-11-30 This resource of primary documents and commentary spans the Hayes and McKinley administrations, selecting and describing five to ten of the foremost issues of the day. The actual texts of the presidents' positions along with the opposing viewpoints are presented. Helpful background information and commentary clarifies the primary sources accurately depicting this dynamic time in the country's past and providing an invaluable resource to any student of American history. The period from 1877 to 1901 marked the end of one United States, a country still reeling from the Civil War, a divided nation of Reconstruction, a land of economic depression, sectional hostility, and governmental corruption. A new United States was emerging. It was an empire, an international power that both negotiated with and fought against European nations with great success and a country with a rebounding economy, vigorous industry, and restored faith. During this Gilded Age, the nation expanded as settlers moved west and displaced native populations. Immigrants entered at the highest rate in the country's history. Geographic expansion gave rise to mighty railroads and industrial expansion brought corporations, company towns, and monopolies. This unprecedented industrialism bolstered urban growth yet economic hardships afflicted rural countryside. Labor and agrarian interests organized.

Right Turn John E. Moser, 2005-04-01 John T. Flynn a prolific writer columnist for the New Republic Harper's Magazine and Collier's Weekly radio commentator and political activist was described by the New York Times in 1964 as a man of wide ranging contradictions In this new biography of Flynn John E. Moser fleshes out his many contradictions and profound influence on U.S. history and political discourse In the 1930s Flynn advocated extensive regulation of the economy the breakup of holding companies and heavy taxes on the wealthy A mere fifteen years later he was denouncing the New Deal as creeping socialism calling for an abolition of the income tax and hailing Senator Joseph McCarthy and his fellow anticommunists as saviors of the American Republic Yet throughout his career he insisted that he had remained true to the principles of liberalism as he understood them It was America's political culture that changed he argued and not his values and views Drawing on Flynn's life and his prolific writings Moser illuminates how liberalism in America changed during the mid twentieth century and considers whether Flynn's ideological odyssey was the product of opportunism or the result of a set of deep seated principles

that he championed consistently over the years In addition Right Turn examines Flynn s role in laying the foundations for the culture war that would be played out in American society for the rest of the century helping to define modern American conservatism
