Интерфейс CLI на основе ролей представляет три типа представления, определяющих доступность команд. Установите соответствие:

Чтобы проконфигурировать любое представление для системы, администратор должен находиться в этом представлении. Это представление имеет наивысший уровень доступа, что и пользователь с уровнем привилегий 15. Однако это представление – это не то же самое, что пользователь уровня 15. Только пользователь этого представления может сконфигурировать новое представление и добавить, или удалить, команды из любого из представлений.	1 Корневое представление
В этом представлении имеется определенный набор команд. В отличие от уровней привилегий, это представление не имеет обратной команд и более высоким или более низким уровней. Команды представления должны быть привнесены все команды, связанные с этим представлением. Представление не наследует команды ни от какого другого представления. Кроме того, другие или те же команды могут использоваться в нескольких представлениях.	2 Суперпредставление
Это представление состоит из одного или нескольких представлений. Администраторы могут определить, какие команды привнесены, и какие информации о конфигурации доступа. В этом представлении администратор может привнесать пользователей и группы пользователей сразу несколькими представлениями, вместо того чтобы привнесать по одному представлению каждому пользователю со своими командами, связанными с этим одним представлением.	3 Представление CLI
