**Presurgical Evaluation of Epileptics** Heinz G. Wieser, Christian E. Elger, 2012-12-06 From the 12th to the 15th September 1985 the International Symposium on Methods of Presurgical Evaluation of Epileptic Patients Basics Techniques and Implications for Epileptology and Surgical Epilepsy Therapy was held in Zurich This symposium was a consequence of the increasing recognition by Europeans especially from German speaking countries of a growing need for surgical therapy of epileptics The main aim was to provide a venue for critical review and lively discussion of presurgical evaluation protocols with special emphasis on the electrophysiological aspects including invasive techniques To provide a necessary background some basic aspects along with postsurgical results had to be dealt with by leading experts in the different fields of experimental and clinical epileptology and neurosurgery It was intended to be an international but moderately scaled meeting Finally however in addition to the European contingent there were participants from Australia Brazil Canada Israel Japan Korea and the United States of America including pioneers from the surgically active centers This international discussion was surely facilitated by the close temporal relationship to the International Congresses XIIIth World Congress of Neurology and XVIth Epilepsy International Congress which took place in Hamburg And probably most important is the fact that the Zurich symposium was dedicated to Prof Rudolf Hess and his lifelong devotion to epilepsy diagnosis and treatment in Switzerland as outlined in the Honorary Address by his eminent colleague and personal friend Prof Henri Gastaut
