Focusing on social determinants of sexual health, at-risk populations, critical factors in approaches to prevention, and reviews of new research, this authoritative volume explores areas as varied as HPV prevention technology, based interventions, migration as a factor in disease transmission, and competencies key to effective leadership in the field. Dispatches from the frontlines of theory, research, and practice in the U.S. and abroad include: Personal risk, public impact; balancing individual rights and STD/HIV prevention; Distribution of prevention resources and its impact on sexual health; Prevention measures in diverse populations of women; Toward a better approach to preventive interventions with men who have sex with men; Adolescent sexual health and STIs; Reducing disparities in sexual health; Lessons from the campaign to eliminate infectious syphilis.
