Preventing Adolescent Pregnancy Model Programs And Evaluations:

Preventing Adolescent Pregnancy Brent C Miller, Josefina J. Card, Roberta L. Paikoff, James L. Peterson, 1992-03-04
Unplanned teenage pregnancy is one of the most challenging problems facing society today To meet this challenge a number of programmes designed to prevent unplanned pregnancies among adolescents have been launched But which ones are the most successful In this volume researchers evaluators and programme directors collectively examine the best designed and most extensively evaluated adolescent pregnancy prevention programmes These cover education contraception and other approaches and encompass a variety of school medical and community settings Successful Prevention and Youth Development Programs Laura Ferrer-Wreder, Håkan Stattin, Carolyn Cass Lorente, Jonathan G. Tubman, Lena Adamson, 2012-02-02 From a European Perspective This book charts territory that is profoundly important and yet rarely fully understood The authors have attempted a task that has relevance to the widest possible range of professionals working with children and adolescents In describing and assessing the fields prevention and promotion they have performed an immense service to researchers in this field but also to practitioners across the spectrum from mental health nurses and doctors to teachers and psychologists from social work professionals to psychiatrists and youth counselors There are two other key elements that should be emphasized from the outset The first is that the approach in this book is truly multi disciplinary with the authors making a genuine attempt to draw upon knowledge and practice derived from all the relevant disciplines The second element which makes this book so important is that the authors have worked across countries to ensure that work in the field of intervention from both North America and from Europe should be included This is as welcome as it is refreshing There appear to be so many barriers to true collaboration between the two continents and so many examples of either North American to what is going on across the or European social scientists appearing blind border that the approach taken here should be wholeheartedly commended This book is essentially a review but a rather special review

Successful Prevention Programs for Children and Adolescents Joseph A. Durlak, 1997-08-31 Successful Prevention Programs for Children and Adolescents presents a wide variety of exemplary programs addressing behavioral and social problems school failure drug use injuries child abuse health and other critical issues Because the validity and generality of these studies is of paramount importance Joseph A Durlak focuses this volume on programs that have been carefully conceptualized conducted and evaluated And because two decades of study indicate that interventions that attempt to change only attitudes and knowledge have not been successful Durlak emphasizes programs that have produced positive effects on behavior and adjustment **The School Practitioner's Concise Companion to Preventing Dropout and Attendance Problems** Cynthia Franklin, Mary Beth Harris, Paula Allen-Meares, 2008 This title gives busy social workers psychologists and counsellors a quick guide to accessible proven solutions for their students most common problems Here readers will find an overview of the factors that put students at risk for missing school and dropping out with strategies to

improve school attendance and engage students *Handbook of HIV Prevention* John L. Peterson, Ralph J.

DiClemente, 2012-12-06 In the nearly two decades since the HIV pandemic began the rapid expansion of behavioral research on HIV prevention has prompted a crucial need for a sourcebook more advanced than an introductory textbook and broader and more readily accessible than a review periodical The Handbook of HIV Prevention is intended as the first attempt to meet this need The current state of affairs led us to edit a book that would represent the major areas of HIV behavioral research at a level appropriate for graduate students and experienced researchers in public health medicine nursing education and the social and behavioral sciences In addition we expect that the handbook will be useful in advanced undergraduate courses and as a reference book for health care professionals Our plans to assemble the Handbook began in the fall of 1996 when we prepared a tentative outline of chapters and invited a large number of distinguished researchers in the field to be the authors of various chapters We received an overwhelmingly favorable response from potential authors to our letters of invitation

After considerable effort by both the contributors and the editors the volume was completed in 1999 when all chapters went to press *The Best Intentions* Institute of Medicine, Committee on Unintended Pregnancy, 1995-06-02 Experts estimate that nearly 60 percent of all U S pregnancies and 81 percent of pregnancies among adolescents are unintended Yet the topic of preventing these unintended pregnancies has long been treated gingerly because of personal sensitivities and public controversies especially the angry debate over abortion Additionally child welfare advocates long have overlooked the connection between pregnancy planning and the improved well being of families and communities that results when children are wanted Now current issues health care and welfare reform and the new international focus on population are drawing attention to the consequences of unintended pregnancy In this climate The Best Intentions offers a timely exploration of family planning issues from a distinguished panel of experts This committee sheds much needed light on the questions and controversies surrounding unintended pregnancy The book offers specific recommendations to put the United States on par with other developed nations in terms of contraceptive attitudes and policies and it considers the effectiveness of over 20 pregnancy prevention programs The Best Intentions explores problematic definitions unintended versus unwanted versus mistimed and presents data on pregnancy rates and trends The book also summarizes the health and social consequences of unintended pregnancies for both men and women and for the children they bear Why does unintended pregnancy occur In discussions of reasons behind the rates the book examines Americans ambivalence about sexuality and the many other social cultural religious and economic factors that affect our approach to contraception The committee explores the complicated web of peer pressure life aspirations and notions of romance that shape an individual's decisions about sex contraception and pregnancy And the book looks at such practical issues as the attitudes of doctors toward birth control and the place of contraception in both health insurance and managed care The Best Intentions offers frank discussion synthesis of data and policy recommendations on one of today's most sensitive social topics This book will be important to policymakers health and

social service personnel foundation executives opinion leaders researchers and concerned individuals *Promoting Health at the Community Level* Doug Easterling, Kaia Gallagher, Dora Lodwick, 2003-05-28 Providing a systematic examination of community based health promotion this text offers nine case studies which illustrate what community driven health promotion means in practice evaluates its potential for achieving improvements in the health of local populations presents strategies for the future School-Based Prevention Programs for Children and Adolescents Joseph A. Durlak, 1995-07-26

Fueled by demands for reform of social and educational programs and pressured for solutions to increasing social problems among youths social policy experts have turned to the promising effectiveness of school based prevention programs School Based Prevention Programs for Children and Adolescents reviews and evaluates the design and impact of such programs pointing out in particular those exemplary prevention efforts that have worked and thus advance knowledge in the prevention field In addition to tracing the development of basic theories and practice the author discusses the factors that assist or hinder program implementation and offers specific examples to illustrate how effective programs can be modified to work He also focuses on understanding the school as an integral social and organizational structure and its special role in prevention programs This volume covers a broad range of prevention programs including prevention of behavioral social and academic problems as well as education in substance abuse and health and looks to model school based prevention programs as a step toward future prevention efforts Preventing HIV in Developing Countries Laura Gibney, Ralph J.

DiClemente, Sten H. Vermund, 2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control *The School Services Sourcebook, Second Edition* Cynthia Franklin, Mary Beth Harris, Paula Allen-Meares, 2012-11-27

The School Services Sourcebook covers every aspect of school service delivery arming practitioners with the nuts and bolts of evidence based practice The second edition has been significantly revised with a new structure including 73 chapters divided into five Parts across thirteen Sections with an additional six chapters included in an online section found on the book's companion website Fifteen new
