## **Preventing Aids In Drug Users And Their Sexual Partners:**

**Preventing AIDS in Drug Users and Their Sexual Partners** James L. Sorensen, Laurie Ann Wermuth, David Ross Gibson, Kyung-Hee Choi, Joseph R. Guydish, Steven L. Batki, 1991-08-09 AIDS is a growing problem yet few books address specific interventions for what is now emerging as a second primary at risk group in the U S and Europe intravenous drug users To date this population has been unresponsive to publicized prevention techniques and the consequences are telling The number of intravenous drug users diagnosed with AIDS has risen steadily from slightly over 18% of the 376 cases reported in 1981 to 28 4% of the 43 339 new cases reported in 1990 Further drug use appears to be the primary link to the heterosexual population Most women with AIDS have been injection drug users and almost all babies born with AIDS have a parent with a history of such abuse Addressing what needs to be done to stem the tide of this second wave of the AIDS epidemic this volume presents research validated information on how to prevent the spread of HIV infection among drug users and their sexual partners

**Preventing AIDS** Ralph J. DiClemente, John L. Peterson, 2013-06-29 Public health has a legacy of neglect regarding social and behavioral research Too often prompted by technical and scientific progress we have ignored even marginalized the vital human element in health thinking and practice Thus for example while family planning programs focused on providing a choice among safe and effective contraceptive methods a supremely worthy goal the central issue of sexuality and sexual behavior was generally neglected Similarly the enormous and important efforts to develop rapid and reliable diagnostic and treatment methods for sexually transmitted diseases helped divert attention away from the crucial issues of sexual practice In short we seem to have difficulty addressing the fundamental behaviors including sex drug taking and other intoxications and violence that are central to the major causes of preventable morbidity disability and premature mortality in the world today Our collective reluctance to examine and understand ourselves is also expressed in the oft repeated pipedream that scientific progress will take care of the HIV AIDS pandemic by delivering a preventive vaccine an effective cure or both Yet even a cursory glance at the relationship between scientific technical progress and health shows that meeting the scientific challenges is only one step toward effective application of the vaccine or drug It is typical not atypical that hepatitis B vaccine is only now becoming relatively freely available to large populations in the developing world more than a decade after the vaccine's licensure

**Preventing Aids** Seth C. Kalichman, 2014-02-25 This book provides a comprehensive overview of behavioral interventions to prevent HIV AIDS risk related behaviors It synthesizes the empirical literature on individual group and community level interventions and provides an objective and detailed assessment of intervention outcomes Factors associated with behavioral risk for HIV transmission theories of HIV risk behavior change and the state of HIV prevention technology transfer are also reviewed Additionally behavioral interventions for adolescents and adults of diverse ethnic and sexual backgrounds are discussed with respect to each intervention type Although the focus is on sexual risk reduction interventions for sexual behavior of substance abusing

populations are also covered      AIDS, Drugs and Prevention Tim Rhodes,1996 In developing HIV prevention community orientated approaches have emerged within statutory and voluntary sectors and from the communities themselves This book considers the diverse approaches and problems for professional practice      AIDS, Sexual Behavior, and Intravenous Drug Use National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on AIDS Research and the Behavioral, Social, and Statistical Sciences,1989-02-01 The AIDS virus is spread by human behaviors enacted in a variety of social situations In order to prevent further infection we need to know more about these behaviors This volume explores what is known about the number of people infected risk associated behaviors facilitation of behavioral change and barriers to more effective prevention efforts      *Women, Drug Use, and HIV Infection* Sally J. Stevens,Stephanie Tortu,Susan L. Coyle,1998 In *Women Drug Use and HIV Infection* you ll see why AIDS is the fourth leading cause of death among women of childbearing age and you ll come to understand why it disproportionately affects minority women many of whom are poor addicted to drugs and or the sexual partners of drug users You ll gain instantaneous access to the data collected by a national multi site Cooperative Agreement funded by the National Institute on Drug Abuse The quantitative and qualitative studies contained in this publication will familiarize you with the lives of women especially susceptible to HIV infection You ll also discover descriptions of prevention strategies that will lower the risk of infection in this high risk population of women In *Women Drug Use and HIV Infection* at least two chapters focus on each main topic giving you a deeper multilayered look at each issue Even after a few chapters you ll find that your understanding of this national societal illness will expand tremendously in these and other areas cultural contexts of various geographical areas of the United States perceptions of HIV risk among the women who use drugs the difference in risk behaviors of drug using women in cities of different sizes with different rates of HIV seroprevalence how past and current domestic violence changes the HIV risk behavior of women who are sexual partners of drug users how the trading of sex for drugs and or money is critical in tracking HIV risk behavior in women *Women Drug Use and HIV Infection* takes its data from a wide variety of U S locations and from a wide variety of women and organizes it in a way that you can understand process and ultimately turn toward transformative action in your rural or urban area of the country You ll get the latest in outreach and intervention efforts and you ll find yourself with more and more recommendations for future prevention      AIDS, Drugs and Prevention Richard Hartnoll,Tim Rhodes,2002-03-11 Strong international focus with high profile contributors from the UK US France Spain and the Netherlands Lack of material attempting to evaluate critically health promotion and health service responses particularly with regard to community based interventions among hard to reach populations Richard Hartnoll is Co ordinator of the European Multi City Study of Drug Misuse and Principle Investigator on the Multi City Study of Cocaine Use      **Handbook of HIV Prevention** John L. Peterson,Ralph J. DiClemente,2000-02-29 The *Handbook of HIV Prevention* is intended to provide a comprehensive overview of the theories methods and approaches for reducing HIV

associated risk behaviors It represents the first single source of information about HIV prevention research in developed and developing countries The Handbook addresses the subject of HIV prevention from two interrelated perspectives First it presents the seminal theories currently used to guide the development and implementation of HIV prevention interventions Second it describes prevention approaches for diverse populations at risk of HIV infection This Handbook provides a compilation of knowledge on HIV prevention by the leading authorities in the field and will be an important resource for students researchers and clinicians in the field

**Behavioral Aspects of AIDS** David G. Ostrow, 2013-06-29 As we enter the last decade of the twentieth century the AIDS epidemic looms ever larger and threatening The specter of upwards of a million deaths in the United States and perhaps many millions worldwide from a sexually transmitted virus shakes our belief in modern medical science while challenging the foundations of democratic society Almost ten years into the epidemic and with an enormous body of basic science research on the Human Immunodeficiency Virus HIV we still do not know why AIDS emerged when it did or how to stop its spread A very humbling experience for scientists clinicians public health experts politicians and the general public Yet there are signs that a well coordinated multidisciplinary research program can conquer the epidemic and perhaps provide the basis for preventing future epidemics The HIV family of viruses is now better understood both in terms of structure and function than any other virus Genetically engineered peptides and nucleic acids are being tested as specific treatments or vaccines against HIV infection disease Most promising are the strides which have been made in understanding those aspects of human behavior which have contributed to the spread of HIV infection and which must be substantially modified if AIDS is to be controlled and eventually eradicated The basis of that understanding has roots in a diverse set of disciplines which have converged in the work presented in this book

*Encyclopedia of Applied Developmental Science* Celia B Fisher, Richard M. Lerner, 2004-10-16 The most comprehensive one stop source for the latest in applied developmental science Don Floyd President and CEO National 4 H Council The Encyclopedia of Applied Developmental Science is an important and timely contribution to this burgeoning field This four volume set is the authoritative source that encompasses the entire range of concepts and topics involved in the study of applied developmental science Its contents and levels have broad appeal for those interested in how the application of knowledge about human development can be used to enhance the lives of individuals families and communities The breadth of activity in applied developmental science makes adequate representation of its concepts and topics a daunting challenge To this end the encyclopedia seeks to answer the following questions How may information about this field be integrated in a manner accessible meaningful and useful to the next generation of the leaders of our nation and world How may we best convey the knowledge necessary for them to understand the nature of their development and the way that they may contribute positively to their own lives to their families and communities and to the designed and natural environments of which they will be stewards The Encyclopedia of Applied

Developmental Science provides the most effective way to address these questions. It includes entries written in an authoritative but not overly technical manner by the broad range of scholars and practitioners involved in applied developmental science. In addition to an alphabetical table of contents, there is a readers guide that organizes the entries into 30 content categories to help the reader locate similarly themed entries with ease. The encyclopedia is ideal for libraries serving those with interests in psychology, human development, human ecology, education, sociology, family and consumer sciences, and nursing, as well as social work and other human services disciplines. The entries are written to be accessible to not only professionals but also to policy makers and other potential consumers of applied developmental science scholarship. This includes young people and their parents, teachers, and counselors.

**Preventing HIV Transmission**, National Research Council and Institute of Medicine, Institute of Medicine, Panel on Needle Exchange and Bleach Distribution Programs, 1995-09-14. This volume addresses the interface of two major national problems: the epidemic of HIV/AIDS and the widespread use of illegal injection drugs. Should communities have the option of giving drug users

sterile needles or bleach for cleaning needs in order to reduce the spread of HIV Does needle distribution worsen the drug problem as opponents of such programs argue Do they reduce the spread of other serious diseases such as hepatitis Do they result in more used needles being carelessly discarded in the community The panel takes a critical look at the available data on needle exchange and bleach distribution programs reaches conclusions about their efficacy and offers concrete recommendations for public policy to reduce the spread of HIV AIDS The book includes current knowledge about the epidemiologies of HIV AIDS and injection drug use characteristics of needle exchange and bleach distribution programs and views on those programs from diverse community groups and a discussion of laws designed to control possession of needles their impact on needle sharing among injection drug users and their implications for needle exchange programs
