Sherman, 1997 **Transcendental Meditation® in Criminal Rehabilitation and Crime Prevention** Kenneth G Walton, David Orme-Johnson, Rachel S Goodman, 2014-01-02 In contrast to the generally dismal results of various approaches to rehabilitation these consciousness based strategies have proven effective in preventing crime and rehabilitating offenders This book will introduce you to a powerful unique approach to offender

rehabilitation and crime prevention In contrast to the generally dismal results of most rehabilitation approaches studies covering periods of 1 15 years indicate that this new approach employing the Maharishi Transcendental Meditation and TM Sidhi programs reduces recidivism from 35 50% Transcendental Meditation in Criminal Rehabilitation and Crime Prevention provides the reader with a theoretical overview new original research findings and examples of practical implementation With this book you will explore what motivates people to commit crimes with emphasis on stress and restricted self development Then you ll examine the results and policy implications of applying these consciousness based techniques to offender rehabilitation and crime reduction Most chapters include tables or figures that make the information easy to understand Transcendental Meditation in Criminal Rehabilitation and Crime Prevention does not merely review the theory behind this innovative approach to rehabilitation and prevention but also emphasizes the practical value of the programs it describes and reports how techniques and strategies based on Transcendental Meditation have been put to use in a variety of settings This book will familiarize the reader with a rehabilitation approach so universal in its applicability that any adult or juvenile offender can begin it at the point of sentencing during incarceration or at the point of parole the in depth background on adult growth and higher states of consciousness necessary to understand this consciousness based developmental approach the results of empirical studies conducted in prisons around the country with up to 15 years of follow up a preview of how cost effective the rehabilitation program might be implications for public policy and the judicial system including an innovative alternative sentencing program how this approach deals not only with individuals but also with the community as a whole when practiced by a small percentage of the population the TM and TM Sidhi programs may reduce crime in the larger community how these society level prevention programs may prove to be effective in reducing not only school violence in the community but if applied on sufficient scale war deaths and terrorism in the greater society

Evidence-Based Crime Prevention David P. Farrington, Doris Layton MacKenzie, Lawrence W. Sherman, Brandon C. Welsh, 2003-09-02 Crime prevention policy and practice is on the whole far from objective Instead of being based on scientific evidence the crime policy agenda is seemingly driven by political ideology anecdotal evidence and programme trends Evidence Based Crime Prevention seeks to change this by comprehensively and rigorously assessing the existing scientific knowledge on the effectiveness of crime prevention programmes internationally Reviewing more than 600 scientific evaluations of programmes intended to prevent crime in settings such as families schools labour markets and communities this book grades programmes on their scientific validity using the scientific methods scale This collection which brings together contributions from leading researchers in the field of crime prevention will provide policy makers researchers and community leaders with an understandable source of information about what works what does not work and what is promising in preventing crime

Successful Prevention and Youth Development Programs Laura Ferrer-Wreder, Håkan Stattin, Carolyn Cass Lorente, Jonathan G. Tubman, Lena Adamson, 2012-02-02 From a European

Perspective This book charts territory that is profoundly important and yet rarely fully understood The authors have attempted a task that has relevance to the widest possible range of professionals working with children and adolescents In describing and assessing the fields prevention and promotion they have performed an immense service to researchers in this field but also to practitioners across the spectrum from mental health nurses and doctors to teachers and psychologists from social work professionals to psychiatrists and youth counselors There are two other key elements that should be emphasized from the outset The first is that the approach in this book is truly multi disciplinary with the authors making a genuine attempt to draw upon knowledge and practice derived from all the relevant disciplines The second element which makes this book so important is that the authors have worked across countries to ensure that work in the field of intervention from both North America and from Europe should be included This is as welcome as it is refreshing There appear to be so many barriers to true collaboration between the two continents and so many examples of either North American to what is going on across the or European social scientists appearing blind border that the approach taken here should be wholeheartedly commended This book is essentially a review but a rather special review What Works (and Doesn't) in Reducing Recidivism Edward J. Latessa, Shelley J. Listwan, Deborah Koetzle, 2014-09-19 This book offers criminologists and students an evidence based discussion of the latest trends in corrections Over the last several decades research has clearly shown that rehabilitation efforts can be effective at reducing recidivism among criminal offenders However researchers also recognize that treatment is not a one size fits all approach Offenders vary by gender age crime type and or addictions to name but a few and these individual needs must be addressed by providers Finally issues such as leadership quality of staff and evaluation efforts affect the quality and delivery of treatment services This book synthesizes the vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders While other texts have addressed issues regarding treatment in corrections this text is unique in that it not only discusses the research on what works but also addresses implementation issues as practitioners move from theory to practice as well as the importance of staff leadership and evaluation efforts *Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 2002: Testimony of members of Congress and other interested individuals and organizations* United States. The Oxford Handbook of Police and Policing Michael Dean Reisig, Robert J. Kane, 2014 The police are perhaps the most visible representation of government They are charged with what has been characterized as an impossible mandate control and prevent crime keep the peace provide public services and do so within the constraints of democratic principles The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency In fact police departments are one of the few government agencies that can be mobilized by a simple phone call 24 hours a day 7 days a week They are ubiquitous within our society but their actions are often not well understood

The Community Justice Ideal Todd R Clear, 2018-03-05 Over the past quarter century U S politicians have responded to the public s fear of crime by devoting ever more resources to building and strengthening the criminal justice apparatus which as a result has grown tremendously in size and cost Policymakers have also taken steps to toughen procedures for dealing with suspects and criminals and broaden legal definitions of what constitutes crime which has led to the incarceration under harsher than ever conditions of a record high percentage of the U S population Yet public confidence in the criminal justice apparatus is if anything lower than ever before and fear of crime continues to be high In

recent years some activists scholars criminal justice officials and politicians have begun to call for a reexamination of get tough crime policies A more sensible approach to crime they argue would focus on community justice that is on building healthy communities in which criminality cannot take root and on making citizens and criminal justice into partners rather than adversaries In this thought provoking study Todd Clear and David Karp provide both a broad theoretical analysis of this ideal and a close examination of a range of attempts to put it into practice in communities throughout the country They conclude that by making the criminal justice system and the public into partners rather than adversaries community justice strategies for dealing with crime are both more effective and more resource efficient than the failed get tough approach
