The Prevention and First-Aid Treatment of Childhood Injuries / Bk With Video William H. Brady, 1990-11-01 Make growing up less dangerous for your children by knowing where and how childhood injuries occur World Report on Child Injury Prevention M. M. Peden, 2008 Child injuries are largely absent from child survival initiatives presently on the global agenda Through this report the World Health Organization the United Nations Children s Fund and many partners have set out to elevate child injury to a priority for the global public health and development communities It should be seen as a complement to the UN Secretary General s study on violence against children released in late 2006 that report addressed violence related or intentional injuries Both reports suggest that child injury and violence prevention programs need to be integrated into child survival and other broad strategies focused on improving the lives of children Evidence demonstrates the dramatic successes in child injury prevention in countries which have made a concerted effort These results make a case for increasing investments in human resources and institutional capacities Implementing proven interventions could save more than a thousand children s lives a day p vii Great Grandma's Guidelines to Prevent Childhood Accidents Florence Parry, 2013-07 The purpose of this book is to bring about a general community awareness of ALREADY KNOWN CONTRIBUTING FACTORS and PRECAUTIONS that can be taken to prevent the constant re occurrence of PREDICTABLE childhood accidents that occur to children aged from 0 to 14 years of age PREVENTION is BETTER than CURE SOMETIMES there is NO CURE When a baby is born the parents are not magically bestowed with all the knowledge and skills of child rearing This has to be learned NOT the HARD WAY by TRIAL and ERROR

Rearing children in such a way can lead to a child having to pay a very high price for his learning experience and the Carer at the time of the accident become deeply affected by feelings of regret and sorrow It makes more sense for parents to FIND OUT BEFORE rather than AFTER an accident has occurred the precautions they could have taken IF ONLY THEY HAD KNOWN

Identifying, Treating, and Preventing Childhood Trauma in Rural Communities Baker, Marion, Ford, Jacqueline, Canfield, Brittany, Grabb, Traci, 2016-06-09 While there have been great strides made in the treatment options available to trauma victims there is a noticeable gap in the availability of medical social and psychological options in rural communities As these hurdles gain more recognition especially in regards to traumatized children research efforts have been intensified in an effort to increase the overall awareness of and find solutions to the improper treatment being provided Identifying Treating and Preventing Childhood Trauma in Rural Communities depicts the issues and challenges rural areas face when treating victims of trauma especially children and adolescents Featuring information on language and cultural barriers as well as the lack of resources available within these rustic environments this publication serves as a critical reference for researchers clinicians educators social workers and medical providers
