Privatizing Public Enterprises Constitutions The State And Regulation In Comparative Perspective:

Privatizing Public Enterprises Cosmo Graham, Tony Prosser, 2023 A comparative examination of the effects of different constitutional and legal traditions on privatization The authors focus on the UK and France suggesting that the British Government was remarkably free from limitation whereas the French were constrained by their written constitution

Privatizing Public Enterprises Graham Cosmo, 1948-, 1998 **Privatizing Public Enterprises** Cosmo Graham, Tony Prosser, 1991 This is the first book to use a comparative approach to examine the effects of different constitutional and legal traditions on privatization Cosmo Graham and Tony Prosser focus on privatization in the UK and France They suggest that the British Government was remarkably free from constitutional limitation whereas in France the written constitution imposed important restrictions on the scope of privatization and on the arrangements of the pricing of shares They go on to describe the links created between privatized enterprises and government by devices such as golden shares and analyse the constraints of competition law and the regulatory arrangements in Britain They also compare the British regulatory agencies with those in the US looking in particular at the way in which the influence of Federal and State constitutions has led to the incorporation of significant elements of openness in decision making procedures This detailed analysis of the effect of legal constraints on economic policy adds a constitutional dimension to what has primarily been seen as an economic issue and will make a unique and valuable contribution to current debates in political studies **The Cambridge Companion to Public Law** Mark Elliott, David Feldman, 2015-08-20 The Cambridge Companion to Public Law examines key themes debates and issues in contemporary public law The book identifies and draws out five key themes the notions of government and the state the place of the state and public law in the world at large relationships between institutions and officials within the state the legitimacy of institutions and the identity and value of public law in relation to politics The book also presents a contemporary examination taking account of the substantial changes witnessed in this area in recent decades and of the resulting need to reassess orthodox accounts of the subject Written by leading authorities drawn from across the common law world their approach is rigorous engaging and highly accessible This Companion acts as both a thoughtful introduction and a collection that consciously moves the discipline forward *Economics of Water Resources: From Regulation to Privatization* Nicolas Spulber, Asghar Sabbaghi, 2013-03-14 The purpose of this book is to develop a general economic model which integrates the quantity and quality issues of water resource management and to provide along with a detailed criticism of the policy instruments now in use alternative proposals concerning the efficient allocation and distribution of water In particular we treat water as a multi product commodity where the market plays a major role in determining water quality discriminant pricing and its value to the user We examine the process of moving from administrative allocation and regulation to privatization of the water industry as the key element in promoting effective competition and in providing economic incentives for greater efficiency Water quantity and quality considered independently of each other have been the

subject of numerous studies during the last twenty years Let us recall briefly the most outstanding among them A variety of models have been constructed concerning the optimal scheduling and sequence of water supply projects dynamic programming for solving multi objective functions in water resource development planning models for coordinating regional water resource supply and demand etc Other studies have devised water quality management models including multi period design of regional or municipal wastewater systems cost allocation methods to induce effluent dischargers to participate in regional water systems models to predict the quality of effluent in particular whether it meets certain established standards models for finding optimal waste removal policies at each of the polluting sources and so on

Shrinking the State Harvey Feigenbaum, Jeffrey Henig, Chris Hamnett, 1998-11-13 Privatization has spread worldwide during the 1980s and 1990s and has significantly reshaped the balance between state and market in many countries This book provides a comparative political analysis of the development form character and causes of privatization in three countries the UK USA and France The authors argue that privatization is a political phenomenon and should be analyzed as such rather than being seen as an economic response to the growth of the state and the cost of state provision Privatization frequently has explicit political goals and has consequences which redistribute costs and benefits to different groups The book presents a threefold typology of privatization policy pragmatic tactical and systemic and relates it to the experiences of USA France and UK respectively It will be of interest to students and scholars of politics economics public policy and business studies as well as policy makers and consultants in the field of privatization

The Political Economy of Privatization in Rich Democracies Herbert Obinger, Carina Schmitt, Stefan Traub, 2016-01-28 Almost all advanced democracies have launched significant privatization programs over the last three decades However while there was a global run into privatization substantial cross national differences in the divestiture of state owned enterprises can be observed This book focuses on the political economy of privatization and addresses the questions What are the driving forces behind this development and how can the variation be explained which are of both theoretical and empirical interest While the topic itself is not new the existing comparative literature on the political economy of privatization suffers from at least two major shortcomings First recent macro quantitative analysis in political science and economics has only focused on material privatization formal privatization has hitherto been neglected due to an absence of data even though this type of privatization is of eminent relevance in the public utility sectors Second most of the empirical studies in this area treat countries as independent units In reality however policy decisions are likely to be interdependent Policy decisions taken in one country influence the decision making process in others Given these shortcomings in the existing literature the idea of this volume is to supply a fresh and comprehensive overview of the political economy of privatization using a new data set the REST database The empirical analysis covers 20 OECD countries in the period between 1980 and the advent of the global economic crisis in 2008 The recent economic crisis provides a good opportunity to take stock of the changing role of government in economic over the last three decades

From the "democratic Deficit" to a "democratic Surplus" Athanasios Psygkas, 2017 Challenging the conventional narrative that the European Union suffers from a democratic deficit Athanasios Psygkas argues that EU mandates have enhanced the democratic accountability of national regulatory agencies This is because EU law has created entry points for stakeholder participation in the operation of national regulators these avenues for public participation were formerly either not open or not institutionalized to this degree By focusing on how the EU formally adopted procedural mandates to advance the substantive goal of creating an internal market in electronic communications Psygkas demonstrates that EU requirements have had significant implications for the nature of administrative governance in the member states Drawing on theoretical arguments in favor of decentralization traditionally applied to substantive policy making this book provides insight into regulatory processes to show how the decentralized EU structure may transform national regulatory authorities into individual loci of experimentation that might in turn develop innovative results It thus contributes to debates about federalism governance and public policy as well as about deliberative and participatory democracy in the United States and Europe This book informs current understandings of regulatory agency operations and institutional design by drawing on an original dataset of public consultations and interviews with agency officials industry and consumer group representatives in Paris Athens Brussels and London The on the ground original research provides a strong foundation for the directions the case law could take and small and larger scale institutional reforms that balance the goals of democracy accountability and efficiency

The Province of Administrative Law Michael Taggart, 1997-06-01 During the past decade administrative law has experienced remarkable development It has consistently been one of the most dynamic and potent areas of legal innovation and of judicial activism It has expanded its reach into an ever broadening sphere of public and private activities Largely through the mechanism of judicial review the judges in several jurisdictions have extended the ambit of the traditional remedies partly in response to a perceived need to fill an accountability vacuum created by the privatisation of public enterprises the contracting out of public services and the deregulation of industry and commerce The essays in this volume focus upon these and other shifts in administrative law and in doing so they draw upon the experiences of several jurisdictions the UK the US Canada Australia and New Zealand The result is a wide ranging and forceful analysis of the scope development and future direction of administrative law

Beyond Survival Cyrus Bina, Laurie M. Clements, Chuck Davis, 2016-09-16 This text uses an innovative approach to the dynamics of labour's decline and proposes policy initiatives necessary for its revitalization The book emphasises the need for restructuring of capitalism on a global scale and challenges traditional economic and industrial relations wisdom

Law, Modernity, Postmodernity Brendan Edgeworth, 2019-07-30 This title was first published in 2003 This book examines the interrelationship between the unravelling of the post war welfare state and legal change By reference to theorists of postmodernity such as Zygmunt Bauman Scott Lash and John Urry and David Harvey the principal argument is that contemporary law and legal institutions can be best understood as having

changed in ways that mirror the recent transformation of the interventionist welfare state and its Fordist Keynesian economic infrastructure. The key changes identified in the legal field include the shift toward marketized regulatory structures as reflected in privatization and deregulation, the attenuation of welfare rights, the privatization of justice, legal polycentricity, the reconfiguration of the welfare state's social citizenship, and the globalization of law. Empirical evidence from a number of jurisdictions is adduced to indicate the general direction of change.

Industry Structure and Regulation Martin C. Stewart-Smith, 1995

The Dynamics of Market Integration Kenneth Kaoma Mwenda, 2000 This book looks at contemporary issues facing financial markets in Eastern and Southern Africa. The book addresses strategies for capital market integration and development on a region wide basis. An argument is made that the establishment of a regional stock exchange and the promotion of multiple listings and cross border trade in securities would stimulate increased liquidity on national stock exchanges in Eastern and Southern Africa. Lessons of experience are drawn from other regions and a case is made against transplanting models of a regional stock exchange from one region to another. The book argues that African countries may however use lessons of experience from other regions as points of reference while pursuing their own discourse of self determination. Each case is unique and is thus surrounded by different variables. The book covers developments in regions such as the European Union, francophone West Africa and Eastern and Southern Africa. Indeed an international and comparative perspective is provided.

The Transformation of Governance in the European Union Rainer Eising, BEATE KOHLER-KOCH, 2003-09-02 The book presents a theoretically informed typology of modes of governance which is tested in a careful selection of comparative country and policy studies. At the core is the question whether the European Union is destined to a network type of governance and whether and how this type of governance will be translated into the member states. The individual chapters subject the governing patterns at European and national level to empirical scrutiny. Drawing on recent research findings in different issue areas including monetary union, social affairs, environment, genetic engineering and market liberalisation in transport, banking, energy, professional services, the contributions highlight the impact of the European activities on policy making process in the member states.

The Crisis of Innovation in Water and Wastewater Duncan A. Thomas, Roger R. Ford, 2005-01-01 This is an extremely well researched and documented book. The authors hypothesis is that the current water and wastewater sector is failing the populations of the western world by clinging to orthodox and short term visions of new technology and innovation and also failing the developing nations by believing that delivery of western world high technology solutions is a contribution to humanitarian development. This is the crisis of innovation. To many practitioners in the water industry the book will be perceived to be hypercritical of the incrementalism, conservative and dogged traditionalism of the sector but in fact it is stimulating and positive. In the latter chapters an alternate more holistic model of water development is described. There needs to be a movement from large central infrastructure resources to distributed systems that are more appropriate to local needs and can be coupled with

environmentally sustainable energy sources and practices Tim Lack European Topic Centre on Water UK Whilst acknowledging a massive leap from standpipe to universal water provision in 100 years in developed countries the authors of this book see problems for global sustainable water supply and wastewater removal in the future Using the UK water industry as an example they describe the global water industry as risk averse and unwilling to innovate a view that is encouraged by the institutional and financial regimes under which it works The book explores the reasons for concern and sets out some hard hitting views on how the water industry is failing to identify and tackle the essential problems in a world which is becoming ever more depleted of fresh water The concluding chapter brings to a focus the problems of the crisis in innovation and gives some concrete suggestions for tackling them This volume should raise the awareness of policymakers and regulators technologists and concerned members of the public Peter Chave Independent Consultant and formerly Head of Pollution Control National Rivers Authority UK This significant new book highlights a little acknowledged but potentially catastrophic crisis of innovation in the global water sector which institutions and industries are frighteningly ill equipped to tackle or even accept It suggests potential new technology and policy approaches to overcome both current and future problems The book explores how technological innovation is vital to help provide sustainable water in both the UK and developing countries However innovation is being overlooked in the face of global trends to privatize and regulate water utilities The authors highlight how the global water sector is failing to respond to increasingly complex world needs and continues to build largely unsustainable centralized infrastructures opposing more appropriate distributed and local modern technologies The book also includes suggestions for potentially innovative technology and policy solutions to meet escalating global water and wastewater demands Importantly the authors adopt a long term perspective that crosses both disciplinary and institutional boundaries and include an international comparative perspective covering a diverse range of examples and countries This comprehensive book will have a broad appeal amongst researchers and academics with an interest in technology management innovation studies geography and development studies It will also be a valuable asset for water regulators and governmental and non governmental organisations working in this field

Law and the Philosophy of Privacy
Janice Richardson, 2015-08-20 Situating privacy within the context of political philosophy this book highlights the way in which struggles concerning the meaning of privacy have always been political Different conceptions of privacy are here shown to involve diverse assumptions about ontology our conceptions of self culture society and communication Privacy theory s debt to Locke Kant or Mill and what is at stake in their conceptual frameworks is examined The extent to which the term privacy has been used to the detriment of and to create weaker parties in marriage in the workplace and now as citizens or non citizens and consumers as well as employees is also demonstrated In contrast Janice Richardson pursues the relevance of Floridi s philosophy of information before turning to her application of Spinoza the philosopher of communication in order to outline a more useful framework through which to think about privacy today The book will be of

interest to those working in political philosophy feminist philosophy law the philosophy of information sociology media and cultural studies

The Oxford Handbook of Comparative Law Mathias Reimann, Reinhard Zimmermann, 2019-03-26 This fully revised and updated second edition of The Oxford Handbook of Comparative Law provides a wide ranging and diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty eight chapters written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field

Law in Environmental Decision-making Tim Jewell, Jenny Steele, 1998 This collection of essays adopts a distinctive approach to environmental legal issues representing a variety of specializations ranging from public law to international law

The Political Economy of Privatization Thomas Clarke, Christos Pitelis, 2005-08-17 In The Political Economy of Privatization the authors assess the success of privatization The work is an international study of the extensive privatization and the pressure towards privatization in different parts of the world The book includes A study of the relationship between ownership and performance An assessment of the importance of market structure and regulation A discussion of privatization strategies within the public sector Individual country case studies looking at the experience of different countries engaged in the contrasting approaches to privatization A critical assessment of the much vaunted relationship between ownership and efficiency

Legal Frameworks for Transparency in Water Utilities Regulation Mohamad Mova Al'Afghani, 2016-08-12 Transparency in the regulation of water utilities is essential in order to ensure quality and fairness This book explores and compares different regulatory arrangements in the water utilities sectors in three jurisdictions to determine which regulatory and ownership model is most transparent and why The three jurisdictions considered are England UK Victoria Australia and Jakarta Indonesia Following an introduction to the importance of transparency in water utilities regulation the book provides an overview of the three chosen jurisdictions and their legal and institutional frameworks Through a comparison of these the author explores the contested and difficult terrain of privatization as often opposed to public ownership in which it is shown that the relationships between transparency and

ownership models are not as clear cut as might be assumed Chapters consider various aspects and outcomes of the regulatory process and the role of transparency including topics such as regulators internal governance mechanisms utilities corporate governance licensing and information flow freedom of information and transparency in tariffs and pricing as well as customer service The book concludes with a summary of lessons learned to inform the refinement of transparency in utilities regulation
