Carter, 2011 *Instincts shape who we are as leaders* They encapsulate the social variety we exhibit to others from the servant to the tyrant Though they are integrated into our every thought and deed we are relatively unaware of what they are or how they impact us Perhaps the frenzied lives we lead are to blame or maybe we spend too much time developing the veneer of leadership rather than excavating its core substance No matter the cause each day we are presented opportunities to make differences in the lives we touch As we awaken to the reality that who we are on the inside has a direct role in what we project on the outside we will have begun the process of apprehending *Untamed Leadership* *Pit Bull* Bronwen Dickey, 2016-05-10 The hugely illuminating story of how a popular breed of dog became the most demonized and supposedly the most dangerous of dogs and what role humans have played in the transformation When Bronwen Dickey brought her new dog home she saw no traces of the infamous viciousness in her affectionate timid pit bull Which made her wonder How had the breed beloved by Teddy Roosevelt Helen Keller and Hollywood's Little Rascals come to be known as a brutal fighter Her search for answers takes her from nineteenth century New York City dogfighting pits the cruelty of which drew the attention of the recently formed ASPCA to early twentieth century movie sets where pit bulls cavorted with Fatty Arbuckle and Buster Keaton from the battlefields of Gettysburg and the Marne where pit bulls earned presidential recognition to desolate urban neighborhoods where the dogs were loved prized and sometimes brutalized Whether through love or fear hatred or devotion humans are bound to the history of the pit bull With unfailing thoughtfulness compassion and a firm grasp of scientific fact Dickey offers us a clear eyed portrait of this extraordinary breed and an insightful view of Americans relationship with their dogs Developing Research Questions Patrick White, 2017-09-06 This no fuss compact guide steers social science students of all levels through the complex process of conducting a research project It explains how to break down initial ideas and broad topics into manageable questions and gives detailed guidance on how to refine these as the project progresses With a wide range of international examples and reflective exercises it is packed with handy tips and examples that show how to avoid common mistakes and pitfalls and ensure that hypotheses and

The Museum Effect

Jeffrey K. Smith, 2014-05-29 Museums libraries and cultural institutions provide opportunities for people to understand and celebrate

who they are were and might be These institutions educate the public and civilize society in a variety of ways ranging from community events to a single child making a first visit The Museum Effect documents this phenomenon explains how it happens and shows how institutions can facilitate this process Cultural institutions vary dramatically in size nature and purpose but they all allow visitors to hold conversations with artists and authors perhaps long dead These conversations sometimes with others present and sometimes with artists scientists explorers or authors not present allow visitors to explore their lives and their possible selves Cultural institutions inspire personal reflection and help visitors better themselves in that they leave having contemplated what is noble excellent or exemplary about the society in which they live The museum effect is a process through which cultural institutions educate and civilize us as individuals and as societies These institutions allow visitors to spend some time with their thoughts elevated and leave the institution better people in some meaningful fashion than when they entered This visionary book presents the underlying idea and the argument for the museum effect along with empirical research supporting that argument It will help those working in museums libraries and archivists to facilitate this process and study how this is working in their own institutions

Reading Empirical Research Studies John R. Hayes, Richard E.

Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities

By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline
