River Runners Of The Grand Canyon:

River Runners of the Grand Canyon David Lavender,1985 **Prospectus** ,1995 **A River Runner's Guide to the History of the Grand Canyon** Kim Crumbo,1981 Kim Crumbo a river ranger at Grand Canyon National Park has written a guide to the rich human history of the river and its canyon Every rapid and other point of interest is discussed and clearly marked **From Powell to Power** Otis Reed "Dock" Marston,Tom Martin,John Weisheit,The Huntingdon Library,2014-12-20 **The Books of the Grand Canyon, the Colorado River, the Green River & the Colorado Plateau** Mike S. Ford,2003 A Bibliography covering one half century of Southwest literature a sequel to Farquhar s *The Books of the Colorado River the Grand Canyon* **Grand Canyon** Robert H. Webb,1996-05 Photographs made in Grand Canyon a century ago may provide us with a sense of history photographs made today from the same vantage points give us a more precise picture of change in this seemingly timeless place Between 1889 and 1890 Robert Brewster Stanton made photographs every one to two miles through the river corridor for the purpose of planning a water level railroad route he produced the largest collection of photographs of the Colorado River at one point in time Robert Webb a USGS hydrologist conducting research on debris flows in the Canyon obtained the photographs and from 1989 to 1995 he replicated all 445 of the views captured by Stanton matching as closely as possible the original camera positions and lighting conditions *Grand Canyon a Century of Change* assembles the most dramatic of these paired photographs to demonstrate both the persistence of nature and the presence of humanity The level of detail obtained from the photographs represent one of the most extensive long term monitoring efforts ever conducted in a national park and the most detailed documentation effort ever performed using repeat photography Much more than simply a picture book *Grand Canyon a Century of Change* is an environmental history of the river corridor a fascinating book that clearly shows the impact of human influence on Grand Canyon and warns us that the Canyon s future is very much in our hands *Day Hikes from the River* Tom Martin,2007-01 Third Edition of a book of maps and descriptions of hikes for river runners in the Grand Canyon Now has a color section of photographs and updated hikes **Hijacking a River** Jeff Ingram,2003 The public waits 13 years for a self guided permit to raft the Colorado River in Grand Canyon while the river awaits Wilderness recognition How did we get in this mess *Hijacking A River* tells the story A pummeled government agency intransigent businessmen and their political allies apathetic environmentalists and disorganized river runners these are the characters who have made a mess of Colorado River management in Grand Canyon National Park Book jacket *Restoring Colorado River Ecosystems* Robert W. Adler,2012-06-22 Over the past century humans have molded the Colorado River to serve their own needs resulting in significant impacts to the river and its ecosystems Today many scientists public officials and citizens hope to restore some of the lost resources in portions of the river and its surrounding lands Environmental restoration on the scale of the Colorado River basin is immensely challenging in addition to an almost overwhelming array of technical difficulties it is fraught with

perplexing questions about the appropriate goals of restoration and the extent to which environmental restoration must be balanced against environmental changes designed to promote and sustain human economic development Restoring Colorado River Ecosystems explores the many questions and challenges surrounding the issue of large scale restoration of the Colorado River basin and of large scale restoration in general Robert W Adler evaluates the relationships among the laws policies and institutions governing use and management of the Colorado River for human benefit and those designed to protect and restore the river and its environment He examines and critiques the often challenging interactions among law science economics and politics within which restoration efforts must operate Ultimately he suggests that a broad concept of restoration is needed to navigate those uncertain waters and to strike an appropriate balance between human and environmental needs While the book is primarily about restoration of Colorado River ecosystems it is also about uncertainty conflict competing values and the nature pace and implications of environmental change It is about our place in the natural environment and whether there are limits to that presence we ought to respect And it is about our responsibility to the ecosystems we live in and use
