**Highway Quality Compendium** ,2007      **Road Network Upgrading and Overland Trade Expansion in Sub-Saharan Africa** Piet Buys,Uwe Deichmann,David Wheeler,2006 Recent research suggests that isolation from regional and international markets has contributed significantly to poverty in many Sub Saharan African countries Numerous empirical studies identify poor transport infrastructure and border restrictions as significant deterrents to trade expansion In response the African Development Bank has proposed an integrated network of functional roads for the subcontinent Drawing on new econometric results the authors quantify the trade expansion potential and costs of such a network They use spatial network analysis techniques to identify a network of primary roads connecting all Sub Saharan capitals and other cities with populations over 500 000 The authors estimate current overland trade flows in the network using econometrically estimated gravity model parameters road transport quality indicators actual road distances and estimates of economic scale for cities in the network Then they simulate the effect of feasible continental upgrading by setting network transport quality at a level that is functional but less highly developed than existing roads in countries like South Africa and Botswana The authors assess the costs of upgrading with econometric evidence from a large World Bank database of road project costs in Africa Using a standard approach to forecast error estimation they derive a range of potential benefits and costs Their baseline results indicate that continental network upgrading would expand overland trade by about 250 billion over 15 years with major direct and indirect benefits for the rural poor Financing the program would require about 20 billion for initial upgrading and 1 billion annually for maintenance The authors conclude with a discussion of supporting institutional arrangements and the potential cost of implementing them      **Quality Control in Road Construction** Michel Ruban,2002-01-01 A translation and fully updated version of the French title Controles de qualite en construction routi re 1987 This book presents the total panorama of the methods and means available to the various interveners      **The Development Dimension Road and Rail Infrastructure in Asia Investing in Quality** OECD,2018-10-06 Road and Rail Infrastructure in Asia Investing in Quality discusses the challenges facing the region and possible policy options including those previously or currently used in Emerging Asian countries with reference to the experiences of OECD member countries

**Environmental Economics in Developing Countries** Achiransu Acharyya, 2022-11-02 The COVID 19 pandemic has laid bare the vulnerabilities of socio-economic systems globally and exposed the risks that natural capital degradation imposes on human health, economy and society. This book studies the environmental challenges faced by developing economies in a post COVID 19 world. Exploring diverse case studies from South Asia and Sub-Saharan Africa, the volume discusses the impact that economic development and recently COVID 19 has had on the environment, ecology and economy of these regions. It analyses nature conservation policies aimed at minimizing ecological damage arising from economic development and discusses the policy objectives of sustainable development. It also highlights the significant role that environmental economics networks have played in capacity building, framing of policies using ecological economics tools and developing a local leadership trained in addressing local sustainability issues. An important contribution to the study of environmental economics of the Global South, the book will be of interest to students and researchers of economics, environment, development studies, development economics, environmental policies and South Asia studies. It will also be useful for policymakers and NGOs working in this field.
