Karen L. Kilcup, 2019-10-25 Throughout the 19th century American poetry was a profoundly populist literary form It circulated in New England magazines and Southern newspapers it was read aloud in taverns homes and schools across the country Antebellum reviewers envisioned poetry as the touchstone democratic genre and their Civil War era counterparts celebrated its motivating power singing poems on battlefields Following the war however as criticism grew more professionalized and American literature emerged as an academic subject reviewers increasingly elevated difficult dispassionate writing and elite readers over their supposedly common counterparts thereby separating authentic poetry for intellectuals from popular poetry for everyone else Conceptually and methodologically unique among studies of 19th century American poetry Who Killed American Poetry not only charts changing attitudes toward American poetry but also applies these ideas to the work of representative individual poets Closely analyzing hundreds of reviews and critical essays Karen L Kilcup tracks the century s developing aesthetic standards and highlights the different criteria reviewers used to assess poetry based on poets class gender ethnicity and location She shows that as early as the 1820s critics began to marginalize some kinds of emotional American poetry a shift many scholars have attributed primarily to the late century emergence of affectively restrained modernist ideals Mapping this literary critical history enables us to more readily apprehend poetry s status in American culture both in the past and present and encourages us to scrutinize the standards of academic criticism that underwrite contemporary aesthetics and continue to constrain poetry's appeal Who American Killed Poetry enlarges our understanding of American culture over the past two hundred years and will interest scholars in literary studies historical poetics American studies gender studies canon criticism genre studies the history of criticism and affect studies It will also appeal to poetry readers and those who enjoy reading about American cultural history

Kilcup, 2021-05-15 Virtually every famous place in literary history and tradition nineteenth century writer Harriet Beecher Stowe Nathaniel Hawthorne Ralph Waldo Emerson and many not so famous wrote literature for children many contributed regularly to children's periodicals and many entered the field of nature writing responding to and forwarding the century s huge social and cultural changes Appreciating America s unique natural wonders dovetailed with children's growth as citizens but children's journals often exceeded a pedagogical purpose intending also to entertain and delight Though these volumes aimed at a relatively conservative and mostly white middle class and affluent audience some selections allowed both children and their parents room for imaginative escape from restrictive social norms Covering a period that initially regarded children's natural bodies as laboring resources Stronger Truer Bolder traces the shifting pedagogical impulse surrounding nature and the environment through the transformations that included America s nineteenth century emergence as an industrial power Karen L Kilcup shows how children s literature mirrored those changes in various ways In its earliest incarnations it taught children and their parents facts about the natural world and about proper behavior vis vis both human and nonhuman others More significantly as periodical writing for children advanced this literature increasingly promoted children's environmental agency and envisioned their potential influence on concerns ranging from animal rights and interspecies equity to conservation and environmental justice Such understanding of and

engagement with nature not only propelled children toward ethical adulthood but also formed a foundation for responsible American citizenship
