**Builders of America** Thomas Bonaventure Lawler,1927 **Native America, Discovered and Conquered** Robert J. Miller,2006-09-30 Manifest Destiny as a term for westward expansion was not used until the 1840s Its predecessor was the Doctrine of Discovery a legal tradition by which Europeans and Americans laid legal claim to the land of the indigenous people that they discovered In the United States the British colonists who had recently become Americans were competing

with the English French and Spanish for control of lands west of the Mississippi Who would be the discoverers of the Indians and their lands the United States or the European countries We know the answer of course but in this book Miller explains for the first time exactly how the United States achieved victory not only on the ground but also in the developing legal thought of the day The American effort began with Thomas Jefferson s authorization of the Lewis Clark Expedition which set out in 1803 to lay claim to the West Lewis and Clark had several charges among them the discovery of a Northwest Passage a land route across the continent in order to establish an American fur trade with China In addition the Corps of Northwestern Discovery as the expedition was called cataloged new plant and animal life and performed detailed ethnographic research on the Indians they encountered This fascinating book lays out how that ethnographic research became the legal basis for Indian removal practices implemented decades later explaining how the Doctrine of Discovery became part of American law as it still is today
