*Promoters, Patriots, and Partisans* Martin Brook Taylor,1989-01-01 During the nineteenth century the writing of history in English speaking Canada changed from promotional efforts by amateurs to an academically based discipline Professor Taylor charts this transition in a comprehensive history The early historians the promoters of the title sought to further their own interests through exaggerated accounts of a particular colony to which they had developed a transient attachment Eventually this group was replaced by patriots whose writing was influenced by loyalty to the land of their birth and residence This second generation of historians attempted both to defend their respective colonies by explaining away past disappointments and to fit events into a predictive pattern of progress and development In the process they established distinctive identities for each of the British North American colonies Eventually a confrontation occurred between those who saw Canada as a nation and those whose traditions and vistas were provincial in emphasis Ultimately the former prevailed only to find the present and future too complex and too ominous to understand Historians subsequently lost their sense of purpose and direction and fell into partisan disagreement or pessimistic nostalgia This abandonment of their role paved the way for the new professional breed of historian as the twentieth century opened In the course of his analysis Taylor considers a number of key issues about the writing of history the kind of people who undertake it and their motivation for doing so the intended and actual effects of their work its influence on subsequent historical writing and the development of uniform and accepted standards of professional practice      Land, Power, and Economics on the Frontier of Upper Canada John Clarke,2001 Land Power and Economics on the Frontier of Upper Canada examines Ontario's formative years focusing on Essex County in Ontario from 1788 to 1850 Upper Canadian attitudes to land and society are shown to have been built on contemporary visions of the cosmos John Clarke examines the actions of individuals from the perspective of the political culture and its manifestations doing so within the constraints of geography and the cultural baggage of the settlers Placing human action in the context of economics and laissez faire capitalism Clarke shows how almost unbridled acquisitiveness and its concomitant land speculation could promote or hinder development      *Loyalist Land Ownership in Upper Canada's Norfolk County, 1792-1851* Colin Read,2025-09-12 After the American Revolution many Loyalists moved north where the British colonial government awarded them generous land grants on favourable terms The intention behind these grants was to create a landed gentry in Upper Canada that would safeguard the colony's political security and build social cohesion among its leadership Loyalist Land Ownership in Upper Canada's Norfolk County 1792-1851 examines the long term landholding of Loyalists and other settlers who arrived in the county before 1812 to judge whether this social experiment succeeded Colin Read explores the various ways that settlers acquired and transmitted land the nature of familial land sales and the place of women in owning land Consulting land records and genealogical research he finds that no landed elite

endured in Upper Canada Loyalists owned only marginally more land than non Loyalists by 1851 and it was commonplace for latecoming settlers to eventually own land Yet early arrival was a significant determinant of later landholding and property size it mattered who settled first Land was the main source of wealth in early Canada This fine grained study sheds light on how it was acquired disposed of and passed down through generations in the nineteenth century Although a landed aristocracy was never realized the colonial state s allocation of land to settlers laid the foundation for their social standing

**Popular Politics and Political Culture in Upper Canada, 1800-1850** Carol Wilton,2000-09-21 Wilton demonstrates that by the 1830s the political energies of Upper Canadians were far more likely to be channelled through petitioning movements than election campaigns Petitioning movements which were connected not only with public meetings but with demonstrations and parades were also increasingly associated with political violence The resulting assaults riots and effigy burnings prominent features of Tory governance not only contributed to the striking political polarization of the population but also helped provoke the Rebellion of 1837 Wilton provides new insights into the careers of leading figures explores the developing ethnic and religious conflicts in the context of the petitioning movements and illuminates the question of officially sponsored political violence Through a thorough examination of primary resources including a wide range of newspapers Colonial Office records published records of the Upper Canadian government pamphlet literature and private correspondence Wilton demonstrates how the province s dissidents challenged established patterns of paternalism subverted official notions of hierarchy and promoted the development of an expanded public sphere in ways that had a lasting influence on the province s political culture *Bluebloods & Rednecks* Charles D. **Atlantic Revolutions, 1776-1838** Michel Ducharme,2014-09-01 In *Idea of Liberty in Canada during the Age of Atlantic Revolutions 1776 1838* Michel Ducharme shows that Canadian intellectual and political history between the American Revolution and the Upper and Lower Canada rebellions of 1837 38 can be better understood by considering it in relation to the broad framework of revolution in the Atlantic world between 1776 and 1838 Inspired by intellectual histories of the Atlantic world Ducharme goes beyond the scholarly focus on Atlantic republicanism to present the rebellions of 1837 38 as a confrontation between two very different concepts of liberty He uses these concepts as lenses through which to read colonial ideological conflict Ducharme traces political discourse in both colonies showing how the differing fates and influence of republican and constitutional notions of liberty affected state development He also pursues a number of important revisionist

historical claims including the idea that nationalist politics were not at issue in the period and that responsible government was never a Patriote party platform or interest Taking a wider view allows Ducharme to provide a solid understanding of the ideological substance of political conflict and shows that starting in 1791 Canadian colonial political culture revolved around an ideal of liberty that differed from the liberty at work within the revolutionary movements of the late eighteenth century but was nonetheless born of the Enlightenment

**Law, Mystery, and the Humanities** Logan Atkinson, Diana Majury, 2008-09-29 The trans disciplinary study of law and the humanities is becoming a more widespread focus among scholars from a range of disciplines Complementary in several major ways concepts and theories of law can be used to formulate fresh ideas about the humanities and vice versa Law Mystery and the Humanities a collection of essays by leading scholars is based on the hypothesis that law has significant contributions to make to ongoing discussions of philosophical issues recurrent in the humanities The philosophical issues in question include the role of rationality in human experience the problem of dissent the persistence of suffering and the possibility of transcendence In each of these areas law is used to add complexity and offer divergent perspectives thus moving important questions in the humanities forward by introducing the possibility of alternative analysis Ranging from discussions of detective fiction Chomsky's universal grammar the poetry of Margaret Atwood the Great Plague of London and more Law Mystery and the Humanities offers a unique examination of trans disciplinary potential

Making Ontario John David Wood, 2000 The colony that became Ontario arose almost spontaneously out of the confusion and uncertainty following the American Revolution as a quickly chosen refuge for some 10 000 Loyalists who had to leave their former homes After the War of 1812 settlers began to spread throughout the inter lake peninsula that was to become southern Ontario and by the middle of the nineteenth century expansion had led to a diversifying agriculture and an increasingly open farming landscape that replaced a mature forest ecosystem The scale of the change from forest to cropland profoundly affected what had been for many decades a rich environment for life forms from large herbivores down to microscopic creatures In Making Ontario David Wood shows that the most effective agent of change in the first century of Ontario's development was not the locomotive but settlers attempts to change the forest into agricultural land Wood traces the various threads that went into creating a successful farming colony while documenting the sacrifice of the forest ecosystem to the demands of progress progress that prepared the ground for the railway Making Ontario provides a detailed focus on environmental modification at a time of great changes It is liberally illustrated with analytical maps based on archival research J David Wood is professor of geography and urban studies at Atkinson College York University
