Hans Hofmann Dawn V. Rogala, 2016-08-01 The career of the German American painter and educator Hans Hofmann 1880 1966 describes the arc of artistic modernism from pre World War I Munich and Paris to mid twentieth century Greenwich Village His career also traces the transatlantic engagement of modern painting with the materials of its own making a relationship that is perhaps still not completely understood In these interrelated narratives Hofmann is a central protagonist providing a vital link between nineteenth and twentieth century art practice and between European and American modernism The remarkable vitality of his later work affords insight not only into the style but also the literal substance of this formative period of artistic and material innovation This richly illustrated book the fourth in the Getty Conservation Institute's Artist's Materials series presents a

thorough examination of Hofmann's late career materials. Initial chapters present an informative overview of Hofmann's life and work in Europe and America and discuss his crucial role in the development of Abstract Expressionism. Subsequent chapters present a detailed analysis of Hofmann's materials and techniques and explore the relationship of the artist's mature palette to shifts in the style and aging characteristics of his paintings. The book concludes with lessons for the conservation of modernist paintings generally and particularly those that incorporate both traditional and modern paint media. This book will be of value to conservators, art historians, conservation scientists, and general readers with an interest in modern art.

The Shock of Recognition Lewis Pyenson, 2020-10-12. In *The Shock of Recognition*, Lewis Pyenson uses a method called Historical Complementarity to identify the motif of non-figurative abstraction in modern art and science. He identifies the motif in Picasso's and Einstein's educational environments. He shows how this motif in domestic furnishing and in urban lighting set the stage for Picasso's and Einstein's professional success before 1914. He applies his method to intellectual life in Argentina, using it to address that nation's focus on an inventory of the natural world until the 1940s, its adoption of non-figurative art and nuclear physics in the middle of the twentieth century, and attention to landscape painting and the wonder of nature at the end of the century.
