Robert Guthrie's Pku Story:

Robert Guthrie--the PKU Story Jean Koch, 1997 This marvelous history tells of Robert Guthrie's campaign to discover and promote world wide newborn testing for PKU anomalies plus a host of other genetic disorders that cause mental retardation or premature death if not treated immediately Dr Guthrie also waged a battle against lead poisoning long before the public or the medical community became concerned about this danger This winsome biography captures the spirit of a soft spoken gentle man who was passionate about helping babies born at risk It is a fitting tribute to a medical crusader and his colleagues who worked tirelessly to save thousands of children from illness and mental retardation **The PKU Paradox**

Diane B. Paul, Jeffrey P. Brosco, 2013-12-01 Named one of the Ten must read science histories by Science Magazine In a lifetime of practice most physicians will never encounter a single case of PKU Yet every physician in the industrialized world learns about the disease in medical school and since the early 1960s the newborn heel stick test for PKU has been mandatory in many countries Diane B Paul and Jeffrey P Brosco's beautifully written book explains this paradox PKU phenylketonuria is a genetic disorder that causes severe cognitive impairment if it is not detected and treated with a strict and difficult diet Programs to detect PKU and start treatment early are deservedly considered a public health success story Some have traded on this success to urge expanded newborn screening defend basic research in genetics and confront proponents of genetic determinism In this context treatment for PKU is typically represented as a simple matter of adhering to a low phenylalanine diet In reality the challenges of living with PKU are daunting In this first general history of PKU a historian and a pediatrician explore how a rare genetic disease became the object of an unprecedented system for routine testing The PKU Paradox is informed by interviews with scientists clinicians policymakers and individuals who live with the disease The questions it raises touch on ongoing controversies about newborn screening and what happens to blood samples collected at birth

Entanglements of Rare Diseases in the Baltic Sea Region Malgorzata Rajtar, Katarzyna E. Król, 2023-10-16 Although rare diseases have captured public attention in recent decades the lived experiences of people affected by these conditions remain on the periphery of medical anthropological inquiry Focusing on Poland Finland and Sweden and foregrounding notions of rare or chronic disease as an embedded category this book critically analyzes entanglements between people and families with rare diseases and care practices that involve local healthcare policies practitioners and treatment modalities Drawing on locally grounded case studies *Entanglements of Rare Diseases in the Baltic Sea Region* constitutes a unique and important contribution to both global medicine and social science scholarship **New Advances in Pediatric Neurologic and**
