McGinley, Nicola Royan, 2010-01-08 Prepared to honour the work of R J Lillie Craik, 1883 Lyall this collection of essays offers new perspectives on the literature and culture of the reign of James VI from his accession as an infant to the throne of Scotland through the Union of the Crowns to his final years as king of Great Britain Its emphasis is on James's reign as a whole stressing the continuities in literary culture throughout the time of his rule rather than the more familiar narrative of disjunction caused by his accession to the English throne in the 1603 Union of Crowns In addition the collection extends its focus beyond a concentration on the environment of James s court to situate the literature of his reign in terms of both regional and international contexts The essays range widely in their approaches and cover topics as diverse as book history and printing textual scholarship and editing language rhetoric and prosody gender attitudes in James s reign travel writing and colonial contexts Latin literary culture and courtly culture and the politics of literary representation Such variety is also evident in the languages discussed which include Scots English Latin and French in the generic range of the subject texts from epic poetry to travel writing and in the writers discussed from the very familiar such as John Knox and Robert Aytoun to the currently less well known such as William Lithgow and Thomas Hudson All the contributors are respected scholars in the discipline including some of the most senior figures in the field Taken as a whole this collection is the most extensive and varied treatment of Scottish literary culture of this period to date and will be a key collection for all students and specialists in the field A Compendious History of English Literature, and of the English Language, from the Norman Conquest George Lillie Craik, 1877 Routledge Revivals: Key Figures in Medieval Europe (2006) Richard Emmerson, 2017-07-05 First published in 2006 Key Figures in Medieval Europe brings together in one volume the most important people who lived in medieval Europe between 500 and 1500 Gathered from the biographical entries from the series Routledge Encyclopedias of the Middle Ages these A Z biographical entries discuss the lives of over 575 individuals who have had a historical impact in such areas as politics religion and the arts It includes individuals from places such as medieval England France Germany Iberia Italy and Scandinavia as well as those from the Jewish and Islamic worlds In one convenient volume students scholars and interested readers will find the biographies of the people whose actions beliefs creations and writings shaped the Middle Ages one of the most fascinating periods of world history
