*Roses and Rose Growing* Rose Georgina Kingsley, 2021-04-04 Book Excerpt water for half an hour before planting Great care must also be taken in every case not to leave the roots of the plants exposed to the air for if the roots get dried up a great and sometimes fatal check is given to the rose Those which cannot be planted

immediately should be laid along a trench and lightly heeled in with soil until they are wanted And even those which are to be planted immediately should have a mat thrown over the roots as they lie beside the bed waiting their turn especially if the day is sunny or the wind cold Many of the great growers advise dipping the roots in liquid mud mixed with a little cow manure before planting Each plant must now be carefully examined and any broken shoot or bruised and broken root cut off with a clean cut For this I prefer a scateur to a knife if the scateur is a very sharp one 1 A torn bruised or broken root if left on the plant will decay right up and do incalculable mischief Sometimes in the case of one's own roses
