Male Suicide and Masculinity in 19th-century Britain

Lyndsay Galpin, 2022-04-07 This book shows how interpretations of suicidal motives were guided by gendered expectations of behaviour and that these expectations were constructed to create meaning and understanding for family friends and witnesses Providing an insight into how people of this era understood suicidal behaviour and motives it challenges the assertion that suicide was seen as a distinctly feminine act and that men who took their own lives were feminized as a result Instead it shows that masculinity was understood in a more nuanced way than gender binaries allow and that a man's masculinity was measured against other men Focusing on four common narrative types the love suicide the unemployed suicide the suicide of the fraudster or speculator and the suicide of the dishonoured soldier it provides historical context to modern discussions about the crisis of masculinity and rising male suicide rates It reveals that narratives around male suicides are not so different today as they were then and that our modern model of masculinity can be traced back to the 19th century

Jewish Non European and thus often neglected The volume offers methods and theories to systematically approach this hidden material as well as case studies on authors and national literatures in a multilingual context It thus contributes to the restructuring of a multilingual transnational literary history that is applicable to different philologies
