Sustainable Construction Materials and Technologies Yoon-Moon Chun, Peter

Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2007-05-31 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K. from June 11th-13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include sustainable alternatives to natural sand, stone and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag, pozzolan, rice husk ash, silica fume, gypsum, plasterboard, drywall and lime in construction; sustainable mortar, concrete bricks, blocks and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes and organic materials; straw bale, hemp, etc. in construction; sustainable use of soil, timber and wood products; and related sustainable construction and rehabilitation technologies. Rodent Pests and Their Control, 2nd Edition Alan P. Buckle, Robert H. Smith, 2015-05-11 The most numerous of the world's invasive species, rodent pests have a devastating impact on agriculture, food, health and the environment. In the last two decades, the science and practice of rodent control has faced new legislation on rodenticides, the pests increasing resistance to chemical control and the impact on non-target species, bringing a new dimension to this updated 2nd edition and making essential reading for all those involved in rodent pest control, including researchers, conservationists, practitioners and public health specialists. *Atlantic Cod* George A. Rose, 2019-02-26 A comprehensive handbook covering all aspects of the Atlantic cod, including the biology, ecology, life histories, behaviour, commercial exploitation and conservation. Not only is Atlantic cod one of the most valuable food fish in the world's oceans, it is an important component of North Atlantic ecosystems and has been subject to much research into its biology, ecology and exploitation. After hundreds of years of exploitation, overfishing in the last half of the 20th Century caused many stocks to collapse, most famously the Northern cod stock off Newfoundland and Labrador, Canada. Since then, most cod stocks have been better researched and managed but remain in a variety of states, from fully recovered to continued decline. This book, written by world experts, describes that research and management and the importance of cod and its fisheries on North Atlantic cultures and economies, with impacts well beyond the range of the species. *Atlantic Cod: Bio Ecology of the Fish* offers insightful chapter coverage of cod nomenclature, taxonomy, phylogeny and morphology, physiology and ecophysiology, reproduction and spawning behavior, early life history and pre-recruitment processes, migrations, movements and stock identity, feeding, growth and energetics, the place of cod in the ecosystem, the exploitation of cod through history and present-day commercial fisheries and precautionary management for sustainable fisheries, impacts of climate change on cod biology.

and ecology and the future of the species and its fisheries Discusses the major commercial importance of Atlantic cod through history Provides a comprehensive treatment of the bio ecology of the most researched and highly exploited fully marine species Examines how the decline and recovery of cod stocks is of great political and scientific interest An essential purchase for marine fisheries scientists Atlantic Cod Bio Ecology of the Fish is a vital book for all fisheries scientists managers and fish biologists *Journal of the Assembly of the State of New York* New York (State). and toxic wastes and prevent them from seeping into the environment These containment systems are now employed at thousands of waste sites around the United States and their effectiveness must be continually monitored Assessment of the Performance of Engineered Waste Containment Barriers assesses the performance of waste containment barriers to date Existing data suggest that waste containment systems with liners and covers when constructed and maintained in accordance with current regulations are performing well thus far However they have not been in existence long enough to assess long term postclosure performance which may extend for hundreds of years The book makes recommendations on how to improve future assessments and increase confidence in predictions of barrier system performance which will be of interest to policy makers environmental interest groups industrial waste producers and industrial waste management industry

Beaver, John Wright, 2009-05-07 Over the past two centuries many aspects of criminal behavior have been investigated Finding this information and making sense of it all is difficult when many studies would appear to offer contradictory findings The Handbook of Crime Correlates collects in one source the summary analysis of crime research worldwide It provides over 400 tables that divide crime research into nine broad categories Pervasiveness and intra offending relationships Demographic factors Ecological and macroeconomic factors Family and peer factors Institutional factors Behavioral and personality factors Cognitive factors Biological factors Crime victimization and fear of crime Within these broad categories tables identify regions of the world and how separate variables are or are not positively or negatively associated with criminal behavior Criminal behavior is broken down into separate offending categories of violent crime property crime drug offenses sex offenses delinquency general and adult offenses and recidivism Accompanying each table is a description of what each table indicates in terms of the positive or negative association of specific variables with specific types of crime by region This book should serve as a valuable resource for criminal justice personnel and academics in the social and life sciences interested in criminal behavior
