Royal Air Force:

The Royal Air Force at Home Ian Watson, 2010-06-19 Military public relations endeavors ultimately seek to build a sense of common interests and aims and so generally foster good relations with the people they defend and there in ensure a stable society The armed forces when engaging on any public relations exercise have traditionally sought to provide an entertaining spectacle For years this has been typified by parades bands mock battles drill displays and other relevant feats of military prowess which have captured the imagination of the public and inspired potential recruits The 20th Century brought a new dimension to the field of warfare and subsequently added a new strand to the fabric of public ceremony and displays by the armed forces That new dimension was the arrival of powered flight Display flying began within five years of the Wright Brothers making their milestone first flight The first events staged in Britain which centered on demonstrations by flying machines were organized by the town councils of Blackpool and Doncaster and were held within days of each other in October 1909 1920 was the year that the first of the famed and legendary Hendon Air Pageants was staged and this is where military air shows traditionally began The Hendon Displays were organized and staged by the still fledgling Royal Air Force and it was probably due in no small part to the prestige and spectacle of this fresh new dimension of military pageantry together with other like events held at RAF airfields through the next two decades that the very existence of the RAF was saved from the threat of abolition The history of the RAF s commitment one that compares almost uniquely with other air forces toward display flying through the years after World War II has now come of age This account of their record in this often overlooked but then again traditional field of military customs describes and illustrates the major public RAF events since 1920

[The Royal Air Force Over Florida](#) A. M. De Quesada, 1998 Before they defended Britain against Hitleras Blitzkrieg many Royal Air Force pilots were sent across the ocean to sunny Florida to receive pilot training Far from the wartime destruction of their homeland these brave pilots some of whom would never return due to accidents that would take their lives received valuable training from the military as well as a warm welcome from the citizens of Florida

The Royal Air Force Sir Peter Le Cheminant, 2001

The Leyland Titan was the last double deck bus to have at least some hand in its design by the old London Transport. Suffering in the early 1970s from the reliability problems of the DMS class of Daimler Fleetline and no longer able to design and build its own buses, London Transport resolved not to be caught out twice. Thus was developed the Leyland Titan, an attractive, amenable and reliable second generation OPO bus that entered revenue earning service on 4 December 1978. With 1 125 bought new and six acquired second hand, the T class went on to complete nearly 25 years on the London frontline. Although its technological sophistication combined with industrial problems afflicting Leyland at the time put off buyers outside the capital, the privatised descendants of these same concerns would snap up second hand Titans when the tendering losses incurred by London Buses Ltd caused examples to flood onto the open market in some cases after less than ten years of service. Many of them would go straight back into service on London routes. The T class saw London through the uncertain period of division and privatisation and in the hands of three successor companies to London Buses Ltd continued to provide stalwart service until 19 June 2003 when T1018 operated on a stage service for the last time. With all remaining examples including those latterly used on schools and private hire work now gone from frontline service, the future careers of the London Transport Titans have been no less fascinating, with buses seeing use by operators large and small the length and breadth of the country.

The London Titan Matthew Wharmby explores in detail the complete history of the last of the bespoke London Transport buses. Illustrated throughout with over 300 colour and black and white photographs, this book will appeal to the many bus enthusiasts around the country.

The Flyer Martin Francis, 2008-11-27 The first scholarly study of the men of the RAF and British culture during the war. The Flyer examines the lives of these men and their popular representation in literary and cinematic texts. It illuminates broader issues of gender, class, race, emotional life and the creation of a national myth in modern Britain.

Badges and Uniforms of the Royal Air Force Malcolm Hobart, 2012-12-19 Throughout the relatively short yet highly distinguished history of the Royal Air Force, there has been a tendency for the men and women of the Service to be overshadowed by the glamour of the aircraft. Nonetheless, it is surprising that there has never before been a complete record of the uniforms and badges of the RAF and its predecessor, the Royal Flying Corps. Malcolm Hobart and Pen and Sword Books have cooperated to rectify this serious omission with this superbly color illustrated and comprehensive collector's guide. Badges of rank and trade are all depicted, not only for the flying arms but for ground staff. This valuable addition to our Collector series also covers the RAF Reserves and Auxiliary Service, Air Training Corps and the Royal Observer Corps.

Air Power and Colonial Control David E. Omissi,1990
Between the world wars the main task of the RAF was to crush tribal rebellions against British rule This study based almost entirely on unpublished documents shows how the independent peacetime role of air policing ensured the survival of the RAF during the lean financial times after WWI Its analysis of rebellion and imperial violence is of interest to a broad audience Distributed by St Martin s Press Annotation copyrighted by Book News Inc Portland OR

The Royal Air Force John Buckley,Paul Beaver,2018-06-22 In 1918 the Royal Air Force became the first major independent air force in the world Formed to serve a strategic need in the most intensive war that Britain had then fought the RAF continued in the inter war era to play a key role in the political and diplomatic world and in defending the Empire During the Second World War the RAF was pivotal in defending Britain from invasion in the Battle of Britain and then in leading the assault on the Axis powers most notably through the contentious bomber offensive against Germany In the post war world the RAF adapted and developed into a force to meet the needs of the United Kingdom during the Cold War the retreat from Empire and most recently in the move to coalition warfare against low intensity threats all against a backdrop of diminishing resources and shifting priorities This is the story of the RAF over the first century of its existence how it has confronted the many challenges and threats it has faced from the Luftwaffe in 1940 through the spectre of nuclear holocaust in the Cold War to the fight against terrorism in the 21st century and how it has contributed to the defence of the United Kingdom throughout that period

The Royal Air Force 1939-45 Andrew Cormack, 2010-04-20 During the middle years of the Second World War the Royal Air Force constituted the only section of the British armed forces in Europe which was routinely on the offensive Its aircraft and operations have been voluminously dealt with by historians but its uniform and flying clothing have received only moderate attention In this fine addition to the Osprey series Andrew Cormack explores the fascinating history of the uniforms of the RAF throughout the Second World War in a text accompanied by numerous contemporary photographs and eight full page colour plates by Ron Volstad

The Birth of the Royal Air Force in World War I Charles River Editors, 2017-10-13 Includes pictures Includes contemporary accounts Includes online resources and a bibliography for further reading One of the most important breakthroughs in military technology associated with World War I and certainly the one that continues to capture the public imagination was the use of airplanes which were a virtual novelty a decade before While the war quickly ground to a halt in its first few months the skies above the Western Front became increasingly busy The great powers had already been acquiring aircraft for potential uses but given that aerial warfare had never been a major component of any conflict it is understandable that few on either side had any idea what the planes were capable of doing Furthermore at the start of the war all sides aircraft were ill equipped for combat mostly because the idea that planes might somehow fight was still a novel one and the adaptations had not yet been developed that would allow the aerial battles later in the war As a result aircraft were used almost entirely for reconnaissance early on allowing generals to gain unprecedented levels of information about enemy movements Such intelligence allowed the French to counter German movements in what became the First Battle of the Marne ending Germany's hopes for victory through the Schlieffen plan Similarly in the east German planes were vital in tracking encircling and destroying Russian forces at Tannenberg Some armies such as the French saw air intelligence as a strategic matter with aircraft capable mainly of identifying enemy forces before battle and contributing to advanced preparations The Germans on the other hand believed that aircraft could provide tactical information once battle had commenced Pilots such as Oswald Boelcke Germany's first great aerial officer would fly over enemy positions in two seat aircraft with a spotter in the back identifying Allied positions and using colored lights to direct the fire of artillery on the ground Of course spotting took on great importance because of the growing range and power of artillery Much of the fire from the great guns was aimed indirectly since the gunners could not see their targets and thus relied on intelligence from others to direct them Maps of enemy held territory were often woefully inadequate to start with and with the need to know where moving enemy formations were positioned the business gained an added complexity but aircraft could cut through this by providing up to date intelligence on enemy positions and sending it back to the gun batteries which were lobbing shells over their own front lines The Royal Air Force RAF Britain's legendary air arm was born in the skies above the First World

War The British had previously used balloons for spotting and reconnaissance for decades and in the years leading up to the war planes started seeing military use They mostly provided reconnaissance though experiments were made in using them offensively During the Boer War of 1899 1902 the British Army used the crews of helium filled balloons to plot and help target artillery fire But these were small tentative steps The first patent to fit a machine gun to a plane taken out in 1910 had not yet led to active fighting vehicles and there was no doctrine no tactics and no combat between massed air fleets That changed during World War I as the skies above the Western Front became the crucible in which the preceding fragments of aerial warfare were smelted in the white hot heat of war For the British this meant the creation of a large and unified flying force which by 1918 would become the RAF The Birth of the Royal Air Force in World War I The History and Legacy of British Air Power during the Great War examines the creation and evolution of the RAF over the course of World War I
