Royal Dockyards:

History of Work and Labour Relations in the Royal Dockyards Ann Day, Kenneth Lunn, 2018-10-24 Focusing on the work and labour history of shipyard workers in the Royal Dockyards this text examines the question of state employment and the specific characteristics of that pattern of industrial relations It encompasses discussions of the nature of work and resistance to forms of authority Particular forms of control are available to the employer which are absent from the experience of the private sector In addition the state is often under pressure to act as a model employer and this can lead to tensions between this objective and the need for financial constraint and public surveillance of the uses of taxation *Chatham Dockyard, 1815-1865* Philip MacDougall, 2020-11-25 By the end of the Napoleonic Wars the seven home dockyards of the British Royal Navy employed a workforce of nearly 16 000 men and some women On account of their size dockyards add much to our understanding of developing social processes as they pioneered systems of recruitment training and supervision of large scale workforces From 1815 1865 the make up of those workforces changed with metal working skills replacing wood working skills as dockyards fully harnessed the use of steam and made the conversion from constructing ships of timber to those of iron The impact on industrial relations and on the environment of the yards was enormous Concentrating on the yard at Chatham the book examines how the day to day running of a major centre of industrial production changed during this period of transition The Admiralty decision to build at Chatham the Achilles the first iron ship to be constructed in a royal dockyard placed that yard at the forefront of technological change Had Chatham failed to complete the task satisfactorily the future of the royal dockyards might have been very different **A Management Odyssey** J. M. Haas, 1994 The Royal Dockyards were Britain s oldest state enterprise and biggest and most complex industrial unit This book shows how the Admiralty over two centuries struggled to master the intractable problems of organization and management which the dockyards presented Haas maintains that the dockyards portrayed an image of being inefficient high cost producers These problems were chiefly extreme centralization but paradoxically weak control inadequate coordination of departments and accounting procedures unreliable information about production costs and material an insufficiently educated and professionalized constructive corps and an underpaid and slack workforce Contents Preface Introduction The Eighteenth Century Running in Place Tinkering with the System 1793 1815 Lightning Ship 1815 1834 Winds of Change 1834 1854 Under Siege 1854 1868 Revolution and Counterrevolution 1868 1885 The Watershed 1885 1900 A New Century and New Ideas 1900 1914 Conclusion Notes Bibliography Index **The Royal Dockyards, 1690-1850** J. G. Coad, 1989 **Royal Dockyards** Philip MacDougall, 1982 *The Royal Dockyards During the Revolutionary and Napoleonic Wars* Roger Morriss, 1983 **Pembroke Dockyard and the Old Navy** Lawrie Phillips, Alan West, 2014-02-03 The Admiralty s specialist shipbuilding yard at Pembroke Dock produced over 200 warships for the Royal Navy including 5 royal yachts between 1814 and 1926 This long century from the Napoleonic War until post First World War covered all the major changes in warship

design and construction from wood to iron and then steel and from sail to steam Despite being established on the south shore of Milford Haven where no warships had ever been built within twenty years Pembroke men were building major British warships In this profusely illustrated edition Lawrie Phillips born and bred just outside the Dockyard walls tells the story of this Admiralty town its ships and the men who built them

Naval Policy Between the Wars, Volume I Stephen Roskill, 2016-07-30 First published in 1968 and 1976 the two volumes of this work still constitute the only authoritative study of the broad geo political economic and strategic factors behind the inter war development of the Royal Navy and to a great extent that of its principal rival the United States Navy Roskill conceived the work as a peacetime equivalent of the official naval histories filling the gap between the First World War volumes and his own study of the Navy in the Second As such it is marked by the extensive use of British and American sources from which Roskill extracted shrewd and balanced conclusions that have stood the test of time

Naval History 1680-1850 Richard Harding, 2017-11-30 This collection of essays sets out to present a sample of the rich diversity of writings on naval history in this period The collection covers subjects ranging from strategy operations and tactics to administration technology and the maritime economy Within this volume the reader will be able to see essays that influenced the development of modern naval history through to samples of some of the latest research

Espionage and Secrecy (Routledge Revivals) Rosamund Thomas, 2016-06-10 This prize winning book first published in 1991 provides a detailed legal account of the development of the UK Official Secrets Acts 1911 1989 In particular the Espionage section s 1 of this criminal law is analysed carefully illustrated by leading cases of UK spies prosecuted under this section particularly during the 1980 s including MI5 officer Michael Bettaney and Geoffrey Prime who worked at GCHQ The author also examines problems of evidence in espionage prosecutions and the consent of the Attorney General in cases under the Official Secrets Acts This book remains the definitive treatise on the UK Official Secrets Acts especially concerning the espionage provisions

The Portsmouth Dockyard Story Dr Paul Brown, 2018-09-24 From muddy creek to naval industrial powerhouse from constructing wooden walls to building Dreadnoughts from maintaining King John s galleys to servicing the enormous new Queen Elizabeth class aircraft carriers this is the story of Portsmouth Dockyard Respected maritime historian Paul Brown s unique 800 year history of what was once the largest industrial organisation in the world is a combination of extensive original research and stunning images The most comprehensive history of the dockyard to date it is sure to become the definitive work on this important heritage site and modern naval base

Naval Power and British Culture, 1760-1850 Roger Morriss, 2017-05-15 Recent work on the growth of British naval power during the eighteenth and nineteenth centuries has emphasised developments in the political constitutional and financial infrastructure of the British state *Naval Power and British Culture 1760-1850* takes these considerations one step further and examines the relationship of administrative culture within government bureaucracy to

contemporary perceptions of efficiency in the period 1760 1850 By administrative culture is meant the ideas attitudes structures practices and mores of public employees Inevitably these changed over time and this shift is examined as the naval departments passed through times of crisis and peace Focusing on the transition in the culture of government employees in the naval establishments in London in the Navy and Victualling Offices as well as the victualling yard towns along the Thames and Medway Naval Power and British Culture 1760 1850 concerns itself with attitudes at all levels of the organisation Yet it is concerned above all with those whose views and conduct are seldom reported the clerks artificers secretaries and commissioners those employees of government who lived in local communities and took their work experience back home with them As such this book illuminates not only the employees of government but also the society which surrounded and impinged upon naval establishments and the reciprocal nature of their attitudes and influences

The Official History of Privatisation Vol. I David Parker,2009 **Transactions of the Institution of Naval**

Architects Institution of Naval Architects,1867 List of members in each volume **Dreadnought** Roger Parkinson,2015-06-01 The years leading to World War I were the Age of the Dreadnought The monumental battleship design first introduced by Admiral Fisher to the Royal Navy in 1906 was quickly adopted around the world and led to a new era of naval warfare and policy In this book Roger Parkinson provides a re writing of the naval history of Britain and the other leading naval powers from the 1880s to the early years of World War I The years before 1914 were characterised by intensifying Anglo German naval competition with an often forgotten element beyond Europe in the form of the rapidly developing navies of the United States and Japan Parkinson shows that although the advent of the dreadnought was the pivotal turning point in naval policy in fact much of the technology that enabled the dreadnought to be launched was a continuity from the pre dreadnought era In the annals of the Royal Navy two names will always be linked those of Admiral Sir John Jacky Fisher and the ship he created HMS Dreadnought This book shows how the dreadnought enabled the Royal Navy to develop from being primarily the navy of the Pax Britannica in the Victorian era to being a war ready fighting force in the early years of the twentieth century The ensuing era of intensifying naval competition rapidly became a full blooded naval arms race leading to the development of super dreadnoughts and escalating tensions between the European powers Providing a truly international perspective on the dreadnought phenomenon this book will be essential reading for all naval history enthusiasts and anyone interested in World War I **The Naval Miscellany** Susan Rose,2020-11-26 This seventh volume of Naval Miscellany contains documents which range in date from the late thirteenth century to the Korean War They illustrate the many different ways in which the naval forces of the crown have served the realm Topics covered include the role of ships in campaigns against Scotland under Edward I and Edward VI the protection of the Iceland fishery in the days of the Commonwealth government and the operation of prize courts during the wars against France in the eighteenth century Moving on to the nineteenth century the supply of timber to the Royal Navy is examined while two contributions deal with

surveying off the west coast of Africa and another prints a diary kept by a member of the Naval Brigade operating onshore in the Zulu War The most recent contributions deal with the origins and development of the Royal Australian Navy up to the 1950s Two more controversial subjects are also included the first gives more information about the storage of cordite on battle cruisers in 1916 and the battle of Jutland the second documents the relief of Admiral North from Gibraltar in 1940 There is something here for every enthusiast for naval history and for all students of the relevant periods *Ships, Shipping and Fishing* George F. Bosworth, 2012-02-02 This 1915 volume traces the development of human ingenuity in shipping from the early dug out boat to the Aquitania **A History of Ship Launches and Their Ceremonies** George Hodgkinson, 2023-10-31 This is an interesting and informative book about a shipbuilding process that might be considered routine Far from it This fine book is full of centuries of launching methods ceremonies superstitions and mishaps PowerShips Throughout history man has been performing rituals at the launch of a new ship to seek supernatural or divine protection for his ship and those who will sail in her The form of the ritual varies according to local custom and religion from the breaking of a coconut to the release of doves to the role of astrologers in choosing an auspicious day for the launch But the sentiment that lies behind all launching ceremonies is fear At the moment of launching a new ship a seafarer is alert to any sign that his ship is not sound He is superstitious and seeks reassurance that his ship and those who will sail in her will be protected The rites of blood sacrifice and libations performed by the ancient Babylonians and Greeks are well evidenced The evolution of this practice into today's tradition of breaking a bottle of wine against the bow of a ship before launch still symbolising sacrifice is explored as well as the now widely practised custom of inviting ladies to name and launch new ships
