## Royal Eggplant:

Royal Eggplant Beatrice Ford, 1991      *The Eggplant Genome* Mark A. Chapman, 2019-05-30 The book discusses the importance of eggplant *Solanum melongena* L as a crop highlighting the potential for eggplant to serve as a model for understanding several evolutionary and taxonomic questions It also explores the genomic make up in particular in comparison to other Solanaceous crops and examines the parallels between eggplant and tomato domestication as well as between the most common eggplant species and two related eggplants native to Africa Ethiopian eggplant *Solanum aethiopicum* L and African eggplant *Solanum macrocarpon* L The eggplant genome was first sequenced in 2014 and an improved version was due to be released in 2017 Further investigations have revealed the relationships between wild species domesticated eggplant and feral weedy eggplant derived from the domesticate as well as targets of selection during domestication Parallels between eggplant and tomato domestication loci are well known and the molecular basis is currently being investigated Eggplant is a source of nutrition for millions of people worldwide especially in Southeast Asia where it is a staple food source Domesticated in the old world in contrast to its congeners tomato and potato the eggplant is morphologically and nutritionally diverse The spread of wild eggplants from Africa is particularly interesting from a cultural point of view This book brings together diverse fields of research from bioinformatics to taxonomy to nutrition to allow readers to fully understand eggplant's importance and potential

**Wealthy Slaves and The Ecclesiastes** Jocelyn de Castro, 2010-09-23 Nature versus Nurture Michael quickly summoned me to his office where his pet spider is housed in an aquarium feeling strange about the idea of having an arachnida for a pet As Michael set me on a miniature ottoman in front of the arachnid's home the terrestrial environment he provided my skepticism promptly transformed into fascination One single spider had reproduced a sac housing hundreds of precious eggs soon to hatch to young uns sadly to the demise of its mother upon their births The gleaming gossamer of spider silk which I had learned in my zoology and biochemistry classes to be the strongest fiber known even stronger than steel One beneficial lesson we humans can learn from this creature is an allimportant one recycling Once the web is destroyed the spider swallows this delicate lace and re uses its protein in rebuilding the next structure Nothing should be wasted even the most despised creature learns from its Creator The eyes have seen the ears have heard the wonders of God's miraculous creation Yet regrettably some people live to say that there is no God Given a glimpse of his home I finally saw what Michael meant in his expression and sentiment over the difference in our homes Michael may not see or admit but as he spoke of my home I can feel the yearning
