**The British Pacific Fleet Experience and Legacy, 1944-50** Jon Robb-Webb, 2016-03-16 The British Pacific Fleet was formed in October 1944 and dispatched to fight alongside the USN in the Central Pacific under Admiral Nimitz Deploying previously unpublished documents this book reveals how relations between the UK and US forces developed from a starting point of barely repressed suspicion to one where both navies came to understand each other and eventually find a remarkable bond Born out of a shared experience of Kamikaze attacks extended operations against bitterly hostile shores the pooling of knowledge and experience the two navies underpinned the diplomatic moves in both Washington and London The book carries the legacy of this experience through to the next Anglo American participation in war Korea It illustrates and explains how and why certain lessons were incorporated into the composition behaviour and structure of the post war Navy It demonstrates the significance of what was learned from the USN by the RN and by USN from the RN As well as examining the background to the largest fleet the Royal Navy ever put to sea the book also charts its effects on Anglo American relations multinational operations alliance building and the ways naval forces are shaped by and in turn shape politics It addresses a period of rapid technological development that witnessed profound changes in the international system and which raised fundamental questions of what navies were for and how should they operate and organize themselves In so doing the study illustrates how the experience of a few long months at the end of the war in the Pacific would cast a long shadow over these issues in the very different circumstances of the post war world

Cyber Warfare and Navies Chris C. Demchak, Sam J Tangredi, 2025-08-19 Cyber Warfare and Navies an edited collection takes a penetrating look into the threats that cyber warfare poses to operations in the maritime environment and the means of defending against cyberattack As with all elements of the digital age navies and commercial maritime operations around the world have become increasingly vulnerable to cyber conflict Navies are obvious targets of hostile national and nonstate cyber actions Almost every aspect of commercial maritime activities has become digitized and interconnected and thus vulnerable to cyber intrusions sabotage viruses and destruction In an era when 85 percent of global trade and 70 percent of all liquid fuels travel by sea cyber effects on ships port handling equipment shipping companies maritime suppliers and other maritime

industries can cripple manufacturing industries and retail businesses on a global basis Neither navies nor commercial shipping can sail away from cyber threats Initially naval leaders had difficulty accepting and preparing for cyber warfare which is largely viewed as a problem on land and from which ships were perceived as disconnected As a consequence effectively integrating cyber operations into its naval warfighting planning has proven challenging not only for the U S Navy but for allied and adversary navies as well The U S Navy created Fleet Cyber Command FCC with the U S Navy s Tenth Fleet as its cyber operational arm and the Navy s component contributing to U S Cyber Command USCYBERCOM However thus far those efforts appear not to have served the Navy or USCYBERCOM as well as anticipated Cyber Warfare and Navies outlines the various threats that cyber warfare poses to naval and commercial maritime operations as well as the abilities of modern navies to defend against those threats It explains how navies are organized and equipped for cyber operations and the concepts and doctrine adopted by those navies and provides recommendations on how to improve maritime cyber operations The book covers not just the U S Navy U S Marine Corps and U S Coast Guard but also the navies of allies opponents China Russia and others The book also explores the relationship between the U S Navy Marine Corps Coast Guard and USCYBERCOM
