Royal World Of Animals:

Royal World of Animals Beatrice Cayzer, 1990 **Art for Animals** J. Keri Cronin, 2018-04-09 Animal rights activists today regularly use visual imagery in their efforts to shape the public's understanding of what it means to be kind and humane toward animals. *Art for Animals* explores the early history of this form of advocacy through the images and the people who harnessed their power. Following in the footsteps of earlier formed organizations like the RSPCA and ASPCA, animal advocacy groups such as the Victoria Street Society for the Protection of Animals from Vivisection made significant use of visual art in literature and campaign materials. But enabled by new and improved technologies and techniques, they took the imagery much further than their predecessors did, turning toward vivid, pointed and at times graphic depictions of human-animal interactions. Keri Cronin explains why the activist community embraced this approach, details how the use of such tools played a critical role in educational and reform movements in the United States, Canada, and England, and traces their impact in public and private spaces. Far from being peripheral illustrations of points articulated in written texts or argued in impassioned speeches, these photographs, prints, paintings, exhibitions, magic lantern slides, and films were key components of animal advocacy at the time, both educating the general public and creating a sense of shared identity among the reformers. Uniquely focused on imagery from the early days of the animal rights movement and filled with striking visuals, *Art for Animals* sheds new light on the history and development of modern animal advocacy. **New Worlds, New Animals** R. J. Hoage, William A. Deiss, 1996-05-07 Illustrated with nearly 100 photographs, *New Worlds, New Animals* gives readers a new respect for and understanding of the role of zoos in social and cultural history. **Animals, Ethics and Trade** Joyce D'Silva, Jacky Turner, 2012-05-16 Modern urban life cuts us off from direct connection with the animal world, yet daily the lives of millions of animals are affected by what we consume and wear and what we trade in. The use of animals for food, labour, and pleasure pursuits has long been justified with the assumption that unlike humans, animals aren't fully sentient beings. In recent years, however, science has revealed an astonishing array of complex animal behaviour, and scientists and policy makers now accept that the animals we make use of are indeed conscious with preferences and intentions. The implications for our culture of factory farming, fast food, and rainforest liquidation are staggering. In this powerful book, internationally renowned experts on animal behaviour and agriculture such as Jane Goodall, Tim Lang, and Vandana Shiva are brought together with ethicists, religious scholars, international industry, and regulators for the first time to debate these critical issues and tackle the profound implications of animal sentience. The first sections discuss scientific and ethical perspectives on the consciousness, emotions, and mental abilities of animals. Later sections address how human activities such as science, law, religion, farming, food production, trade, development, and education respect or ignore animals' sentience and welfare, and review the options for changes in our policies, our practices, and our thinking. The result is nothing less than a stark and necessary look into the heart of humanity and the ethics that govern our animal-powered society. Journal of the
