BBC Radiophonic Workshop's BBC Radiophonic Workshop - A Retrospective William L. Weir,2023-05-04 In 1958 an anonymous group of overworked and under budgeted BBC employees set out to make some new sounds for radio and TV They ended up changing the course of 20th century music For millions of people the work of the BBC Radiophonic Workshop was the first electronic music they had ever heard Sampling loops and the earliest synthesizers long before audiences knew what they were made up the groundbreaking scores for news programs auto maintenance shows and children s programming They also produced the Doctor Who theme one of the first electronic music masterpieces The Beatles Pink Floyd and others borrowed from them A generation of musicians raised on BBC programming

Aphex Twin Portishead and Prodigy among them took these once alien sounds and carried on the Workshop's legacy Ignored for decades by music historians the Workshop is now recognized as one of the most influential forebears of electronica psychedelia ambient music and synth pop *The Berkeley Undergraduate Journal*, 1998 *The American Roman Noir* William Marling, 1998-10-01 In *The American Roman Noir* William Marling reads classic hard boiled fiction and film in the contexts of narrative theories and American social and cultural history His search for the origins of the dark narratives that emerged during the 1920s and 1930s leads to a sweeping critique of Jazz Age and Depression era culture Integrating economic history biography consumer product design narrative analysis and film scholarship Marling makes new connections between events of the 1920s and 1930s and the modes styles and genres of their representation At the center of Marling's approach is the concept of prodigality how narrative represents having and having had too much Never before in the country he argues did wealth impinge on the national conscience as in the 1920s and never was such conscience so sharply rebuked as in the 1930s What asks Marling were the paradigms that explained accumulation and windfall waste and failure Marling first establishes a theoretical and historical context for the notion of prodigality Among the topics he discusses are such watershed events as the trial of Sacco and Vanzetti and the premiere of the first sound movie *The Jazz Singer* technology's alteration of Americans' perceptive and figurative habits and the shift from synecdochical to metonymical values entailed by a consumer society Marling then considers six noir classics relating them to their authors' own lives and to the milieu of prodigality that produced them and which they sought to explain Dashiell Hammett's *Red Harvest* and *The Maltese Falcon* James M Cain's *The Postman Always Rings Twice* and *Double Indemnity* and Raymond Chandler's *The Big Sleep* and *Farewell My Lovely* Reading these narratives first as novels then as films Marling shows how they employed the prodigality fabula's variations and ancillary value systems to help Americans adapt for better or worse to a society driven by economic and technological forces beyond their control [Rethinking Art History](#) Donald Preziosi, 1989-01-01 A general overview of the theoretical and institutional history of the discipline of art history Refuting the image of art history as a discipline in crisis Preziosi asserts that many of the dilemmas and contradictions of art history today are not new but can be traced back to problems surrounding the founding of the discipline its institutionalization and its academic expansion since the 1870s Donald Preziosi has written a timely and incisive study of the methods and assumptions of art history in the modern period As the book unfolds one realizes that art history was never as unitary and monolithic as the phrase the discipline of art history suggests but is in fact a complicated and highly contradictory range of practices whose disciplinary coherence may be more mythical than real This is a deliberately discomfiting book however for its clear sightedness rigor and wit it is a book to be welcomed by everyone concerned with the present condition and future direction of visual studies Norman Bryson Harvard University An important and courageous book *Rethinking Art History* is a rigorous and original contribution to the current post structuralist and postmodernist debates in cultural studies here and abroad Steven Z Levine Bryn Mawr College

Through this kind of reading of the discourse of art history Preziosi provides some acute analysis of the metaphors and stratagems which continue to discipline the discipline of art history **Duchamp** Juan Ramírez, 2013-06-01 Marcel Duchamp's stature in the history of art has grown steadily since the 1950s as several artistic movements have embraced him as their founding father But although his influence is comparable only to Picasso's Duchamp continues to be relatively unknown outside his narrow circle of followers This book seeks to explain his oeuvre which has been shrouded with mystery Duchamp's two great preoccupations were the nature of scientific truth and a feeling for love with its natural limit death His works all speak of eroticism in a way that pushes the socially acceptable to its outer limits Juan Antonio Ramirez addresses such questions as the meaning of the artist's ground breaking ready mades and his famous installation *Etant donn* s his passionate essay reproduces all of Duchamp's important works in addition to numerous previously unpublished visual sources Duchamp Love and Death even is a seminal monograph for understanding this crucial figure of modern art

American Literature and Science Robert Scholnick, 2021-10-21 Literature and science are two disciplines are two disciplines often thought to be unrelated if not actually antagonistic But Robert J Scholnick points out that these areas of learning up through the beginning of the nineteenth century were understood as parts of a unitary endeavor By mid century they had diverged but literature and science have continued to interact conflict and illuminate each other In this innovative work twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science's conflicting meanings as a central dimension of the nation's conception of itself Reaching back to the Puritan poet minister physician Edward Taylor who wrote at the beginning of the scientific revolution and forward to Thomas Pynchon novelist of the cybernetic age this collection of original essays contains essential work on major writers including Franklin Jefferson Poe Emerson Thoreau Twain Hart Crane Dos Passos and Charles Olson Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus even while resisting their destructive applications this book points towards a reconciliation and integration within culture An innovative look at a neglected dimension of our literary tradition American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry *The Comic Art Collection Catalog* Michigan State University Libraries. Special Collections Division, 1993 This is the most comprehensive dictionary available on comic art produced around the world The catalog provides detailed information about more than 60 000 cataloged books magazines scrapbooks fanzines comic books and other materials in the Michigan State University Libraries America's premiere library comics collection The catalog lists both comics and works about comics Each book or serial is listed by title with entries as appropriate under author subject and series Besides the traditional books and magazines significant collections of microfilm sound recordings vertical files and realia mainly T-shirts are included Comics and related materials are grouped by nationality e.g. French comics and genre e.g. funny animal comics Several times larger than any previously published
