Rubian Economic Reform At Risk:

Handbook of Financial Data and Risk Information I Margarita S. Brose, Mark D. Flood, Dilip Krishna, Bill Nichols, 2014
Volume I examines the business and regulatory context that makes risk information so important. A vast set of quantitative techniques, internal risk measurement and governance processes and supervisory reporting rules have grown up over time, all with important implications for modeling and managing risk information. Without an understanding of the broader forces at work, it is all too easy to get lost in the details. Back cover
Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26
In today's increasingly globalized environment, many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace. One such consideration is the failing dynamics of the international tax infrastructure. Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes, considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model. The book considers the impact neoliberalism had and will have on regulatory infrastructure, democracy in an era of globalization, and reduced legitimization of the national state. The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere, macro economics, and the political philosophical context in which law and economics emerge. The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example. This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies. Neoliberalism 2.0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future, the implications of globalization, and the changing relationship between citizens and their state. **Journal of Political Science**, 1997

Challenging the State Merilee S. Grindle, 1996-02-23
The 1980s and 1990s posed great challenges to governments in Latin America and Africa. Deep economic crises and significantly heightened pressure for political reform severely taxed their capacity to manage economic and political tasks. These crises pointed to an intense need to reform the state and redefine its relationship to the market and civic society. This book examines the paradox of states that have been weakened by crisis just as their capacity to encourage economic development and provide for effective governance most needs to be strengthened. Case studies of Mexico and Kenya allow the author to analyse the opportunities available for political leadership in moments of crisis and the constraints on action provided by leadership goals and existing political and economic structures. She argues that while leaders and political structures are often part of the problem, they can also be part of the solution in building more efficient, effective, and responsive states. **Asia-Pacific Contemporary Finance and Development** William A. Barnett, Bruno S. Sergi, 2019-06-19
This volume of The International Symposia in Economic Theory and Econometrics explores and investigates contemporary challenges and issues facing the Asia Pacific economies. For researchers and students of economics and finance, this volume is a fascinating exploration of emerging topics in one of the fastest growing
