too distant from our own It begins when a group of scientists faced with the possibility of impending extinction of the human species at human hands decides to take action After decades of discussion and research they conclude that the only solution is to eradicate all males of the species and to design a blueprint for a female comprised new world order that accords to nature the preeminent position it lost under male domination In this new world order politics and religion are abandoned as basic institutions of society and consensus rules Knowledge of a world previous to the new world order is possessed by only one woman the Archivist It is she who is the most respected of women though she wields no power outside of the world of books When she wanders too far outside the walls of the Great Library to which she is bound from birth things go awry and the impossible occurs Her quiet life of books and solitary research becomes a life of adventure and subterfuge love and loss until once again she must face choices made by the ancestors who created her world **Wild At Heart** Vickie
