*The Sculptural Idea* James J. Kelly, 1981 This book examines many different aspects of sculpture its history form matter content etc      **Materials and Processes of Contemporary Sculpture** Mahmoud Farag, 2020-01-17 Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it Prior to a few decades ago most sculptors were restricted to carving stone and wood or casting plaster ceramics and bronze for their creations Contemporary sculptors however are no longer bound by the limitations of these traditional materials and processes and can now create works in sizes forms and textures that could not have been achieved previously Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing To fully utilize the full potential of such new materials the sculptor needs to understand their points of strength their limitations and the most effective way of shaping them to achieve a given design Although this book is written by a materials engineer the subject matter is presented from the point of view of the sculptor with emphasis on the strengths and weaknesses of different materials their resistance to weather conditions natural color and possible surface textures possible methods of shaping and joining tools and equipment needed and safety measures to take Whenever possible case studies are used to illustrate the sequence of processes and the cost elements involved in shaping a given material to create an actual work of sculpture

life completing commissions for large scale public sculptures in countries around the world The scale of Moore s success in later life has tended to obscure the radical nature of his achievement Rejecting the influence of his teachers and inspired by works from other cultures he saw in museums Moore championed direct carving evolving abstract sculptures derived from the human body He was involved in the modernist Seven and Five Society and later in Unit One Written by Henry Moore in the 1930s these three powerful polemical texts lay out his ideas about sculpture calling for truth to materials openness to other sculptural traditions and understanding of the importance of scale Illustrated with archival photographs and with an introduction by his daughter Mary Moore this book gives new insights into Moore s working methods and inspiration and speaks directly to artists today *The Creative Process* Brewster Ghiselin,1952 Interest in the creative process isn t new Both Plato and Aristotle discussed its intricacies and so have many others over the past two thousand years This unusual collection provides a lively sampling of what 38 writers artists and scientists have had to say about creativity While not always comforting their remarks offer new ways of understanding the creative struggle Discipline and hard work are clearly integral to the process but as editor Brewster Ghiselin notes so too is listening to the voice of eccentricity within ourselves and in the world Page 4 of cover

**Human-Environment Relations** Emily Brady,Pauline Phemister,2012-02-01 This fresh and innovative approach to human environmental relations will revolutionise our understanding of the boundaries between ourselves and the environment we inhabit The anthology is predicated on the notion that values shift back and forth between humans and the world around them in an ethical communicative zone called value space The contributors examine the transformative interplay between external environments and human values and identify concrete ways in which these norms residing in and derived from self and society are projected onto the environment

Hawthorne, Sculpture, and the Question of American Art Deanna Fernie, 2016-12-05 Deanna Fernie analyzes the significance of sculpture in Hawthorne's fiction through the recurring motif of the fragment in its double guise as ruin and project. Her book casts new light on Hawthorne's memorable ruined and unfinished images from the rough hewn figurehead of Drowne's Wooden Image 1844 to the tattered letter A in the unfinished loft of the Custom House in *The Scarlet Letter* 1850 and the unfinished bust of Donatello in *The Marble Faun* 1860. Fernie shows how the tension between the formed and unformed enabled Hawthorne to interrogate the origins and the distinctive possibilities of art in America in relation to established European models. At the same time she suggests that sculpture challenged and provoked Hawthorne's shaping of his own specifically literary art, stimulating him to develop its capacities for expressing irresolution and change. Fernie establishes the intellectual contexts for her study through a discussion of sculpture and fragmentary form as revealed in American, British, and Continental thought. Her book will be an important text not only for American literature scholars but also for anyone interested in British and Continental Romanticism and the intersections of art and literature.
