Rodin Claudine Mitchell,2017-07-05 The expression the Zola of Sculpture was coined in the circles of the Royal Academy in the 1880s as a term of abuse Rodin The Zola of Sculpture reveals how the appraisal of Rodin in British culture was shaped by controversies around the literary models of Zola and Baudelaire in a period when negative notions about French culture were being progressively transformed into positive expressions of modern sculpture Embedded within this collaborative book is the editor's proposition that Rodin came to play an important role in the cultural politics of the Entente Cordiale at a critical juncture of European history Encompassing new scholarship in several disciplines drawn from both sides of the Channel Rodin The Zola of Sculpture offers the first in depth account of Rodin's career in Britain in the period 1880 1914 and weaves this historical trajectory into a complex investigation of the interactions between French and British cultures The authors examine the cultural agencies in which conceptions of Rodin's practice played a defining role dealing in turn with artists professional associations art criticism private and public collectors and the education of women sculptors **The Architecture of Narrative Time** Erica Wickerson,2017 Scholars and students of modern literature anyone with an interest in the work of Thomas Mann Medieval Architecture Nicola Coldstream,2002 Medieval architecture comprises much more than the traditional image of Gothic cathedrals and the castles of chivalry A great variety of buildings synagogues halls and barns testify to the diverse communities and interests in western Europe in the centuries between 1150 and 1550 This book looks at their architecture from an entirely fresh perspective shifting the emphasis away from such areas as France towards the creativity of other regions including central Europe and Spain Treating the subject thematically Coldstream seeks out what all buildings both religious and secular have in common and how they reflect the material and spiritual concerns of the

people who built and used them Furthermore the author considers how and why after four centuries of shaping the landscapes and urban patterns of Europe medieval styles were superseded by classicism *Retracing the Expanded Field* Spyros Papapetros, Julian Rose, 2014-10-24 Scholars and artists revisit a hugely influential essay by Rosalind Krauss and map the interactions between art and architecture over the last thirty five years Expansion convergence adjacency projection rapport and intersection are a few of the terms used to redraw the boundaries between art and architecture during the last thirty five years If modernists invented the model of an ostensible synthesis of the arts their postmodern progeny promoted the semblance of pluralist fusion In 1979 reacting against contemporary art's transformation of modernist medium specificity into postmodernist medium multiplicity the art historian Rosalind Krauss published an essay *Sculpture in the Expanded Field* that laid out in a precise diagram the structural parameters of sculpture architecture and landscape art Krauss tried to clarify what these art practices were what they were not and what they could become if logically combined The essay soon assumed a canonical status and affected subsequent developments in all three fields *Retracing the Expanded Field* revisits Krauss's hugely influential text and maps the ensuing interactions between art and architecture Responding to Krauss and revisiting the milieu from which her text emerged artists architects and art historians of different generations offer their perspectives on the legacy of *Sculpture in the Expanded Field* Krauss herself takes part in a roundtable discussion moderated by Hal Foster A selection of historical documents including Krauss's essay presented as it appeared in October accompany the main text Neither eulogy nor hagiography *Retracing the Expanded Field* documents the groundbreaking nature of Krauss's authoritative text and reveals the complex interchanges between art and architecture that increasingly shape both fields Contributors Stan Allen George Baker Yve Alain Bois Benjamin Buchloh Beatriz Colomina Penelope Curtis Sam Durant Edward Eigen Kurt W Forster Hal Foster Kenneth Frampton Branden W Joseph Rosalind Krauss Miwon Kwon Sylvia Lavin Sandro Marpillero Josiah McElheny Eve Meltzer Michael Meredith Mary Miss Sarah Oppenheimer Matthew Ritchie Julia Robinson Joe Scanlan Emily Eliza Scott Irene Small Philip Ursprung Anthony Vidler **Binding the Absent Body in**

Medieval and Modern Art Emily Kelley, 2017-07-05 This collection of essays considers artistic works that deal with the body without a visual representation It explores a range of ways to represent this absence of the figure from abject elements such as bodily fluids and waste to surrogate forms including reliquaries manuscripts and cloth The collection focuses on two eras medieval and modern when images referencing the absent body have been far more prolific in the history of art In medieval times works of art became direct references to the absent corporal essence of a divine being like Christ or were used as devotional aids By contrast in the modern era artists often reject depictions of the physical body in order to distance themselves from the history of the idealized human form Through these essays it becomes apparent even when the body is not visible in a work of art it is often still present tangentially Though the essays in this volume bridge two historical periods they have coherent thematic links dealing with abjection embodiment and phenomenology Whether figurative or abstract

sacred or secular medieval or modern the body maintains a presence in these works even when it is not at first apparent
