Death and the Classic Maya Kings James L. Maya Imagery, Architecture, and Activity Maline D. Werness-Rude, Kaylee R. Spencer, 2015-05 Maya Imagery Architecture and Activity privileges art historical perspectives in addressing the ways the ancient Maya organized manipulated created interacted with and conceived of the world around them The Maya provide a particularly strong example of the ways in which the built and imaged environment are intentionally oriented relative to political religious economic and other spatial constructs In examining space the contributors of this volume demonstrate the core interrelationships inherent in a wide variety of places

and spaces both concrete and abstract They explore the links between spatial order and cosmic order and the possibility that such connections have sociopolitical consequences This book will prove useful not just to Mayanists but to art historians in other fields and scholars from a variety of disciplines including anthropology archaeology geography and landscape architecture

The Memory of Bones Stephen D. Houston, Stuart David, Karl Taube, 2013-05-01 An analysis of the intellectual and emotional life of ancient Mesoamerican people through studies of figural works and inscriptions All of human experience flows from bodies that feel express emotion and think about what such experiences mean But is it possible for us embodied as we are in a particular time and place to know how people of long ago thought about the body and its experiences In this groundbreaking book three leading experts on the Classic Maya ca AD 250 to 850 marshal a vast array of evidence from Maya iconography and hieroglyphic writing as well as archaeological findings to argue that the Classic Maya developed an approach to the human body that we can recover and understand today Starting with a cartography of the Maya body as depicted in imagery and texts the authors explore how the body was replicated in portraiture how it experienced the world through ingestion the senses and the emotions how the body experienced war and sacrifice and the pain and sexuality how words often heaven sent could be embodied and how bodies could be blurred through spirit possession From these investigations the authors convincingly demonstrate that the Maya conceptualized the body in varying roles as a metaphor of time as a gendered sexualized being in distinct stages of life as an instrument of honor and dishonor as a vehicle for communication and consumption as an exemplification of beauty and ugliness and as a dancer and song maker Their findings open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do through the body

Beyond Kinship Rosemary A. Joyce, Susan D. Gillespie, 2017-06-13 Beyond Kinship brings together ethnohistorians archaeologists and cultural anthropologists for the first time in a common discussion of the social model of house societies proposed by Claude Levi Strauss While kinship theory has been central to the study of social organization an alternative approach has emerged that of seeing the house both as a physical and symbolic structure and a principle of social

organization The house stands as a model social formation that is distinguished by its attention to a number of material domains land the dwelling ritual and nonritual objects As the essays in this volume make clear the focus on material culture and on place contributes to the ongoing convergence of anthropology and history and helps erase the artificial distinctions between prehistory and history Contributions to the volume offer significant new interpretations of primary data as well as reconsidering classic ethnographic material Beyond Kinship crosses the boundaries within anthropology not only between cultural anthropology and archaeology but between structural symbolic and materialist approaches and between American and British schools of anthropology it is intended to advance the fruitful dialogue now taking place within the field

Yaxchilan Carolyn E. Tate, 2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America other scholars have only a limited time to study and understand the sites before the jungle weather and human encroachment efface them again perhaps forever This urgency underlies Yaxchilan The Design of a Maya Ceremonial City Carolyn Tate s comprehensive catalog and analysis of all the city s extant buildings and sculptures During a year of field work Tate fully documented the appearance of the site as of 1987 For each sculpture and building she records its discovery present location condition measurements and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan More than mere documentation however the book explores the phenomenon of art within Maya society Tate establishes a general framework of cultural practices spiritual beliefs and knowledge likely to have been shared by eighth century Maya people The process of making public art is considered in relation to other modes of aesthetic expression such as oral tradition and ritual This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms in education in a semiliterate society and in developing the personal and community identities of individuals Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period Individual sculptures are attributed to the hands of single artists and workshops thus aiding in dating several of the monuments The significance of headdresses backracks and other costume elements seen on monuments is tied to specific rituals and fashions and influence from other sites is traced These analyses lead to a history of the design of the city under the reigns of Shield Jaguar A D 681 741 and Bird Jaguar IV A D 752 772 In Tate s view Yaxchilan and other Maya cities were designed as both a theater for ritual activities and a nexus of public art and social structures that were crucial in defining the self within Maya society

identity Using an innovative interdisciplinary approach Matthew Looper examines several types of data relevant to ancient Maya dance including hieroglyphic texts pictorial images in diverse media and architecture A series of case studies illustrates the application of various analytical methodologies and offers interpretations of the form meaning and social significance of dance performance Although the nuances of movement in Maya dances are impossible to recover Looper demonstrates that a wealth of other data survives which allows a detailed consideration of many aspects of performance To Be Like Gods thus provides the first comprehensive interpretation of the role of dance in ancient Maya society and also serves as a model for comparative research in the archaeology of performance
