Scythian Art Crafts Of The Early Eurasian Nomads:

Scythian Art Georges Charrière, 1979 *The Art of the Scythians* Esther Jacobson, 2022-11-14 This volume considers the art of the Scythians of the northern littoral of the Black Sea as that art was expressed in gold silver bronze and bone Appearing by the seventh century B C at the edge of an expanding Hellenic world the history and art of the Scythians must be considered within a context that recognizes the sources of Scythian culture in the Eurasian Steppe as well as the historical contingency of West Asia and the Greek colonies By approaching the understanding of artistic traditions in terms of an evolving process rooted in an archaic steppe culture but ultimately shaped by the confrontation of Near Eastern Hellenic and Hellenistic tastes this discussion goes beyond the traditional location of Scythian art as a subset of Greek goldwork Particular consideration is given to the gradual transformation of object types and styles from their reflection of archaic zoomorphic representations in carved bone wood and bronze to traditions expressive of Hellenized tastes and sensibilities in gold and silver By examining in detail individual objects as well as classes of objects this volume articulates a specifically Scythian stylistic and iconographic tradition and a specifically Scythian contribution to the working of precious metals related to but ultimately distinguishable from the goldworking traditions of Achaemenid Iran late Classical Greece and the larger Hellenistic world This volume offers substantial bibliography relating to the extensive research on Scythian art archaeology and history published in the Russian and Ukrainian languages over the last 150 years **The Scythian**

Connection and the Shamanistic Crowns of Ancient Korea Shirley Fish, 2021-08-22 The Three Kingdoms Period in Korean history consisted of the kingdoms of Silla Koguryo and Paekche It was only the Silla kingdom which seemed to have had a connection to the ancient nomadic Scythians These people seemed so different from the indigenous inhabitants who were already living in Korea during the 3th to 6th centuries CE It is the author's opinion is that they were the descendants of the Scythians who although they would not have called themselves Scythians they were none the less the remnant members of nomadic tribes that pushed eastward from Central Asia and Siberia to the Korean peninsula Once in Southern Korea they established the Silla kingdom where their time honored beliefs are depicted in their mound burials wooden burial chambers gold crowns horse riding and also in their Siberian shamanism This time period of the gold crowns and the people who produced the royal headgear was the Maripgan Period and as mentioned they were the descendants of Scythians who although in Central Asia and Siberia were known to have existed as far back as 10 000 years BC they were always on the move searching for new pasturelands for their herds or to avoid conflicts and war with their enemies The Silla crowns were created around the 5th to the 7th centuries in Kyongju the former capital of the Silla people When they were discovered in various archaeological mound sites they were found to be in a highly fragile state The crowns were each designated as national treasures by the Korean government and most weigh about one kilogram Some of the crowns came in two parts an inner gold cap which may have been covered in silk fabric and sat inside of the crown and the crown itself The crowns were

totally shamanistic in their symbolism and represented the belief systems of the Scythians of Central Asia and Siberia which eventually made its way to Korea and the ancient Kingdom of Silla *Liber 420* Chris Bennett,2018-04-20 Although little known cannabis and other psychoactive plants held a prominent and important role in the Occult arts of Alchemy and Magic as well as being used in ritual initiations of certain secret societies Find out about the important role cannabis played in helping to develop modern medicines through alchemical works Cannabis played a pivotal role in spagyric alchemy and appears in the works of alchemists such as Zosimos Avicenna Lull Paracelsus Cardano and Rabelais Cannabis also played a pivotal role in medieval and renaissance magic and recipes with instructions for its use appear in a number of influential and important grimoires such as the Picatrix Sepher Raxiel Liber Salomonis and The Book of Oberon Could cannabis be the Holy Grail With detailed historical references the author explores the allegations the Templars were influenced by the hashish ingesting Assassins of medieval Islam and that myths of the Grail are derived from the Persian traditions around the sacred beverage known as haoma which was a preparation of cannabis opium and other drugs Many of the works discussed have never been translated into English or published in centuries The unparalleled research in this volume makes it a potential perennial classic on the subjects of both medieval and renaissance history of cannabis as well as the role of plants in the magical and occult traditions *The Age of Deer* Erika Howsare,2025-01-07 A masterful hybrid of nature writing and cultural studies that investigates our connection with deer from mythology to biology from forests to cities from coexistence to control and extermination and invites readers to contemplate the paradoxes of how humans interact with and shape the natural world Deer have been an important part of the world that humans occupy for millennia They re one of the only large animals that can thrive in our presence In the 21st century our relationship is full of contradictions We hunt and protect them we cull them from suburbs while making them an icon of wilderness we see them both as victims and as pests But there is no doubt that we have a connection to deer in mythology and story in ecosystems biological and digital in cities and in forests Delving into the historical roots of these tangled attitudes and how they play out in the present Erika Howsare observes scientists capture and collar fawns hunters show off their trophies a museum interpreter teaching American history while tanning a deer hide an animal control officer collecting the carcasses of deer killed by sharpshooters and a woman bottle raising orphaned fawns in her backyard As she reports these stories Howsare s eye is always on the bigger picture Why do we look at deer in the ways we do and what do these animals reveal about human involvement in the natural world For readers of H is for Hawk and Fox I The Age of Deer offers a unique and intimate perspective on a very human relationship

Ehresmann,1990 **The Golden Deer of Eurasia** Metropolitan Museum of Art (New York, N.Y.),2000 Spectacular works of art were excavated between 1986 and 1990 from burial mounds at Filippovka in Russia on the border of Europe and Asia The objects were created from about the fifth to the fourth century B C by pastoral people who lived on the steppes near the southern Ural Mountains The large funerary deposits include wooden deerlike creatures with predatory mouths and elongated snouts and ears overlaid with sheets of gold and silver as well as gold attachments for wooden vessels and gold and silver luxury wares imported from Achaemenid Iran These treasures are now in the collection of the Archaeological Museum Ufa in the Russian republic of Bashkortostan The discoveries at Filippovka open a new chapter in the history of the material culture of the nomads who in the first millennium B C traversed the steppe corridor extending from the Black Sea region to China Yet the information provided by the Filippovka excavations is complicated and ambiguous The identity of the people represented by the finds remains uncertain

but the forms and ornamentation of many works from Filippovka as well as the cemetery's location in the southern Urals argue for the cultural chronological designation of this material as Early Sarmatian. Stylistic features however point also to the arts of Siberia, Central Asia and China in the east and to the art of the Meotian Scythians in the west. Imported Achaemenid goods raise questions about their place of production and about the circumstances that brought them to be included in tombs on the southern Ural steppes. Finally robbers penetrated the burials in antiquity destroying much of the evidence necessary for understanding the Filippovka nomads' religious and funerary practices. These are among the issues addressed in this volume, the catalogue for an exhibition at The Metropolitan Museum of Art that brings together the remarkable new material from Filippovka and from the incomparably rich collections of the State Hermitage, Saint Petersburg, related luxury objects found in graves of other Eurasian steppe tribes. Gold and silver objects from the Scythian Black Sea tombs, textiles and leather and wooden works from the Altai Mountains and gold and bronze pieces from the Caucasus, Central Asia and Siberia illustrate developments in the art of the steppes in the centuries preceding the Filippovka burials in contemporary societies and in later centuries toward the turn of the first millennium B.C. These outstanding works not only place the Filippovka discoveries in their proper historical and cultural context but are themselves fascinating and enigmatic.

The Age of Pyrrhus Tony Hackens, 1992 *Bibliographic Guide to Art and Architecture* New York Public Library, Art and Architecture Division, 1983 *Mythical and Fabulous Creatures* Malcolm South, 1987-03-12. This serious scholarly treatment of 20 imaginary beings from dragon and phoenix to giants and fairies discusses the origin of each as an idea, its symbolism and lore and its appearances in art, literature or film. Extensive bibliographies follow the generally ambitious and erudite essays while a final catch-all article and selective bibliography cover still more ground at a gallop. There are a number of thoughtful and well-written interpretive investigations into the nature and history of some persistent types. Entries on the Basilisk, Harpies, Medusa and the Sphinx are particularly fine; here one feels that the mystery and power of these imaginative creatures is not vitiated by scholarly taxidermy. Library Journal. This book provides thorough documentation of the best-known creatures of fantasy with a breadth of coverage that is both impressive and delightful.
