Global Stability Analysis of Shear Flows Rameshkumar Bhoraniya, Gayathri Swaminathan, Vinod Narayanan, 2023-03-10 This book presents the fundamentals and advanced research on the global stability analysis of the shear flows. The contents investigate the results of global stability analysis for different configurations of internal and external shear flows. The topics covered are global stability analysis of converging/diverging channel flows, axisymmetric boundary layer developed on a circular cylinder, cone and inclined flat plate boundary layer and wall jets. It further explains the effect of divergence, convergence, transverse curvature and pressure gradients on the global stability of the different configurations of shear flows. Methods in Practical Laboratory Bacteriology Henrik Chart, 2018-05-04 The success of laboratory experiments relies heavily on the technical ability of the bench scientist with the aid of tricks of the trade to generate consistent and reliable data. Regrettably, however, these invaluable tricks of the trade are frequently omitted from scientific publications. This paucity of practical information relating to the conduct of laboratory bacteriology experiments creates a gaping void in the pertinent literature. *Methods in Practical Laboratory Bacteriology* fills this void. It provides detailed technical information that ensures that you achieve consistent and reliable data. The book addresses the aspects of bacterial fractionation and membrane characterization, the analysis of lipopolysaccharides and the techniques of SDS PAGE immunoblotting and ELISA. It also describes the methods used for detecting and quantifying bacterial resistance to antibiotics and the analysis of bacterial chromosomes by pulsed field gel electrophoresis (PFGE). *Methods in Practical Laboratory Bacteriology* also covers protocols for extracting the fingerprinting plasmids as well as the use of non-radio labeled gene probes and ribosomal RNA gene probes.

Polysaccharide Carriers for Drug Delivery Sabyasachi Maiti, Sougata Jana, 2019-06-14 Polysaccharide Carriers for Drug Delivery presents the latest information on the selection of safe materials. Due to reported safety profiles on polysaccharides, they have been the natural choice for investigation. A wide variety of drug delivery and biomedical systems have been studied; however, the related information, either concept-wise or application-oriented, is scattered, therefore becoming difficult for readers and researchers to digest in a concise manner. This gathering of information will help readers easily comprehend the subject matter. Focuses on biopolysaccharide-based distinct approaches for drug delivery applications. Illustrates new concepts and highlights future scope for clinical development. Provides comprehensive up-to-date information on different aspects of drug delivery technology.

Fish Processing Technology George M. Hall, 2012-12-06 As with the first edition, this book includes chapters on established fish processes and new processes and allied issues. The first five chapters cover fish biochemistry affecting processing, curing, surimi and fish mince, chilling and freezing and canning. These established processes can still show innovations and improved theory, although their mature status precludes major leaps in knowledge and technology. The four chapters concerned with new

areas relevant to fish processing are directed at the increasing globalisation of the fish processing industry and the demands from legislation and the consumer for better quality safer products One chapter reviews the methods available to identify fish species in raw and processed products The increased demand for fish products and the reduced catch of commercially important species has lead to adulteration or substitution of these species with cheaper species The ability to detect these practices has been based on some elegant analytical techniques in electrophoresis The Polish Climate in the European

Capillary Electrophoresis Methods for Pharmaceutical Analysis Satinder Ahuja, Mohamedilias Jimidar, 2011-08-09 Capillary electrophoresis CE is a powerful analytical technique that is widely used in research and development and in quality control of pharmaceuticals Many reports of highly efficient separations and methods have been published over the past 15 years CE offers several advantages over high pressure or high performance liquid chromatography HPLC These include simplicity rapid analysis automation ruggedness different mechanisms for selectivity and low cost Moreover EC requires smaller sample size and yet offers higher efficiency and thus greater resolution power over HPLC These

characteristics are very attractive in research and development even more so in pharmaceutical quality control QC and stability monitoring SM studies This book will provide busy pharmaceutical scientists a complete yet concise reference guide for utilizing the versatility of CE in new drug development and quality control Provides current status and future developments in CE analysis of pharmaceuticals Explains how to develop and validate methods Includes major pharmaceutical applications including assays and impurity testing

Testing and Assessment in Counseling Practice C.
Edward Watkins, Jr., Vicki L. Campbell, 2012-12-06 The primary purpose of this revision remains identical to that of the first edition to show how key personality cognitive behavioral and vocational tests assessment procedures can be used by counselors in their work with clients Too often assessment books only provide the reader with information about tests and assessment procedures They do not however take the next step showing readers how these tests assessment procedures can be used and integrated into the actual work of counseling This revision is designed to fill that void Chapter authors all of whom are experts in their respective topic areas share the theoretical and research backgrounds about a particular test assessment procedure and then provide a case example or examples to show how assessment data can be meaningfully incorporated into the counseling process
