Newsreview ,1999 *Great Athletes* ,2010 *Seoul Ambition* Joel Cressman,2023-11-14 Seoul Ambition is the remarkable story of how the nation of South Korea despite its infamous obsession with academics focuses feverishly on

sports in ways much different than what we're used to in the West. South Korean athletes dominate leaderboards in international golf events and have won the most Olympic medals of all time in archery and short track speed skating. The country has produced transcendent talents in figure skating and the budding arena of esports, creating a seemingly never-ending pipeline of children who want to emulate their success. Yet the talent development process in Korea presents an interesting conundrum. Though all young athletes pour in hours of practice, Korean athletes traditionally only become world class in a select few niche sports. One victory from a 20-year-old golfer caused one of the greatest talent rushes in modern sports, but a captivating World Cup run in men's soccer did not. In fact, Son Heung-min, the most dynamic Korean soccer player of all time, actually had to rebel against the system to become a creative genius. What is happening behind the scenes? After spending years as a coach and physical education teacher in Seoul, author Joel Cressman set out to answer that question. *Seoul Ambition* explores the amazing stories of a young baseball prodigy who taught himself how to throw left-handed to become one of the most accurate Major League pitchers of all time. How South Korea intentionally used East Germany as a model to win more medals and the ideological battle over North Korea. An educational system that pushes athletes to focus full time on their sports while ignoring academics to get into top universities. Why the Korean Basketball League banned tall players to help save the sport. The story and the surprising neuroscience behind how Korea became the global hotbed of professional video gaming. The misconceptions of Tiger Parenting and how a hands-on parenting style is viewed differently by East Asian children than Western kids. Why the country's best speed skater was forced to defect to Russia. How the national men's and women's hockey teams willed themselves from obscurity to compete with the world's best at the 2018 Olympics. Full of extraordinary stories of athletes and their dedicated parents, the book explores the science and history behind one of the most interesting sports cultures in the world. *Seoul Ambition* will change the way you think about talent and creativity, the power of community and national identity, and the fascinating process of creating world-class athletes.

The Fictions that Shape Men's Lives Christopher Kilmartin, 2021-04-21. *The Fictions that Shape Men's Lives* is structured around a number of key fictions of masculinity such as beliefs in biological determinism, the inevitability of men's violence, and the opposition of the sexes, and proceeds to expose them to be wholly or partially unfounded. Examining the social pressure to behave and experience the self in ways that culture prescribes for the bodies we are perceived as having, this book provides an awareness of widely held but distorted assumptions of gender. It also seeks to put men into the position to resist masculine social pressures when conforming to it conflicts with important life goals or values and/or causes harm. Making use of an informal storytelling style provides an accessibility to those interested in breaking down their preconceptions of gender and masculinity as well, making links to key theories and concepts. This is a lively and engaging book for undergraduates studying introduction to Gender, Sexuality, and Masculinity courses.

Homer Kelley's Golfing Machine Scott Gummer, 2009 In 1939 an average Joe named Homer Kelley played golf for the first time and scored 116, a respectable score for a beginner but frustrating for a science-obsessed perfectionist like Kelley. He did not play again for six months, then carded a 77. He devoted the next 30 years to solving the science behind the perfect golf swing. Here veteran journalist Scott Gummer brings to light the untold story of golf's most curious genius.

Driven Kevin Cook, 2008-08-21 An inside look at the creation of the new breed of superstar golfers. Golf keeps looking for the next phenom who will take over the game the way Tiger Woods did in the mid-nineties. But in all likelihood this young golfer will not be discovered but created in a gated three-hundred-acre complex in Florida called the David Leadbetter Golf Academy. Here exists a fierce training ground where ultra-high-tech cameras provide cutting-edge swing analysis and young players spend almost every waking hour on the driving range. In *Driven*, award-winning journalist Kevin Cook shows how the game has evolved from a sport of paunchy men to one populated with muscular youngsters blasting tape-measure drives. A vivid snapshot of a rapidly changing game, *Driven* is a riveting look at the making of golf's next generation.
