name origin     The Antioch Review John Donald Kingsley,1947     **A New Island Biogeography of the Sea of Cortés** Ted J. Case,Martin L. Cody,Exequiel Ezcurra,2002-11-21 This updated and expanded A New Island Biogeography of the Sea of Cort s first published nearly 20 years ago integrates new and broader studies encompassing more taxa and more complete island coverage The present synthesis provides a basis for further research and exploration in upcoming years of the biologically fascinating Sea of Cort s region The Gulf region is increasingly being exploited for its natural resources by way of marine fisheries and for its stunning natural beauty by way of a burgeoning tourism industry Further the region s human population is increasing apace It is appropriate therefore that this volume discusses these evolving circumstances and the efforts of the Mexican government to regulate and manage them The new Biogeography includes a section on the conservation issues in the Sea of Cort s past accomplishments and conservation needs as yet outstanding This book should be of strong interest to conservation biologists ecologists and evolutionary biologists more generally     *Reclaiming John Steinbeck* Gavin Jones,2021-06-10 John Steinbeck is a towering figure in twentieth century American literature yet he remains one of our least understood writers This major reevaluation of Steinbeck by Gavin Jones uncovers a timely thinker who confronted the fate of humanity as a species facing climate change environmental crisis and a growing divide between the powerful and the marginalized Driven by insatiable curiosity Steinbeck s work crossed a variety of borders between the United States and the Global South between human and nonhuman lifeforms between science and the arts and between literature and film to explore the transformations in consciousness necessary for our survival on a precarious planet Always seeking new forms to express his ecological and social vision of human interconnectedness and vulnerability Steinbeck is a writer of urgent concern for the twenty first century even as he was haunted by the legacies of racism and injustice in the American West     Radial Symmetry Katherine Larson,2011-04-26 Katherine Larson is the winner of the 2010 Yale Series of Younger Poets Competition With Radial Symmetry she has created a transcendent body of poems that flourish in the liminal spaces that separate scientific inquiry from empathic knowledge astute observation from sublime witness Larson s inventive lyrics lead the reader through vertiginous landscapes geographical phenomenological psychological while always remaining attendant to the speaker s own fragile creaturely self An experienced research scientist and field ecologist Larson dazzles with these sensuous and sophisticated poems grappling with the powers of poetic imagination as well as the frightful realization of the human capacity for ecological destruction The result is a profoundly moving collection eloquent in its lament and celebration Metamorphosis an excerpt We dredge the stream with soup strainers and separate dragonfly and damselfly nymphs their eyes like inky bulbs jaws snapping at the light as if the world was full of tiny traps each hairpin mechanism tripped for transformation Such a ricochet of appetites insisting life life life against the watery dark the tuberous reeds     *The World in Which We Occur* Neil W. Browne,2007-10-31 Understanding our environment American philosopher John Dewey considered all human endeavors to be continuous with the natural world In his writings particularly Art as

Experience 1934 Dewey insists on the primacy of the environment in aesthetic experience Dewey's conception of environment includes both the natural and the man made Neil Browne highlights this notion in order to define what he terms pragmatist ecology a practice rooted in the interface of the cultural and the natural which he finds to be a significant feature of some of the most important ecological writing of the last century To fully understand human involvement in the natural world Browne argues disciplinary boundaries must be opened up This is primarily important between the arts and science with profound implications for the practice of democracy The degradation of the physical environment and democratic decay for Browne are rooted in the same problem our persistent belief that humans are somehow separate from their physical environment Browne probes the work of a number of major American writers through the lens of Dewey's philosophy Among other texts he examines John Muir's *My First Summer in the Sierra* 1911 *Sea of Cortez* 1941 by John Steinbeck and Edward Ricketts Rachel Carson's three books about the sea *Under the Sea Wind* 1941 *The Sea Around Us* 1951 and *The Edge of the Sea* 1955 John Haines's *The Stars the Snow the Fire* 1989 Tarry Lopez's *Arctic Dreams* 1986 and Terry Tempest Williams's *Refuge* 1991 Together these texts with their combinations of scientific observation and personal meditation challenge the dichotomies to which we've become accustomed and affirm the values of a pragmatist ecology one in which ecological and democratic values go hand in hand
