Broadhead,1992-01-01 The Gospels of the NT are strategic narratives of proclamation The primary focus of these narratives is christological Miracle stories play a central role in this narrative process and in its resulting christological portrait Strategies of interpretation must be consciously shaped to highlight this narrative strategy and its christological focus The first three statements now seem self evident yet these conclusions were reached relatively late in the history of research The fourth contention lies at the center of recent methodological debate in Gospel studies This analysis will re evaluate the miracle traditions through a methodology designed to highlight the narrative identity and the christological focus of the Gospel of Mark The primary goal of this analysis is reconsideration of the role played by miracles stories in the characterization of Jesus As a secondary goal this analysis will address the ongoing question of which methodological approaches best contribute to the aims of NT studies
