Coastal Waters of Mauritania W.J. Wolff, J. van der Land, P.H. Nienhuis, P.A.W.J. de Wilde, 2012-12-06 This volume on the ecology of Mauritanian coastal waters and in particular the Banc d'Arguin allows us to understand the functioning of this remarkable coastal wetland. Major questions concern the interaction between the Banc d'Arguin ecosystem on the one hand and the adjoining systems of the open ocean with its intensive upwelling phenomena and the Sahara desert on the other. Is the Banc d'Arguin ecosystem relatively isolated from its surroundings and does it function as a tropical pocket in a more temperate surrounding as suggested by Sevrin Reyssac 1983 or does it interact with both the Sahara and the Atlantic Ocean? At the Banc d'Arguin the area between the estuarine parts and the open ocean is extremely shallow and largely uncharted. Large research vessels cannot penetrate the shallows whereas small vessels are often unable to negotiate the outer part of the shallow area due to rough weather conditions. Hence separate teams report on work at the seaward side of this shallow sill and at the landward side. In addition other teams address different questions such as the productivity of the seagrass beds and the benthic fauna, the number of birds spending the summer at the Banc d'Arguin and the distribution of several taxonomic groups of flora and fauna. Pelagic Distribution and Abundance of Seabirds in the Gulf of Alaska and Eastern Bering Sea Patrick J. Gould, Douglas J. Forsell, Calvin J. Lensink, 1982 Atlas based on censuses conducted from ships and aircraft over waters of the Gulf of Alaska and eastern Bering Sea.
