Seals are the sleekest and most agile of all marine mammals and they are superbly adapted to the watery world in which they spend most of their time With their whiskery dog like faces curious nature and vulnerable pups they are enduringly appealing animals Although air breathing seals are superbly tuned to hunt sleep mate and keep warm while out at sea but they remain inextricably linked to land In Spotlight Seals Frances Dipper explores the intricate lives of the UK s native Grey and Common Seals and their amazing physical and behavioural adaptations to a life split between land and sea She reveals the complex physiology that allows seals to dive deep and for long periods without coming to any harm Once exploited for their meat and skins seals now have protection around the British Isles Their numbers are increasing but they still face the danger of plastic litter in their environment Dipper also explores age old legends interactions between humans and seals and the best places to watch them in the UK The Spotlight series introduces readers to the lives and behaviour of our favourite animals with eye catching colour photographs and informative expert text Education Law Michael Imber,Tyll van Geel,J. A Year with the Seals Alix Morris, 2025-07-10 For readers of Jennifer Ackerman and Ed Yong environmental journalist Alix Morris recounts the year she spent following seals investigating their fascinating behaviour the effects of their extraordinary return from near extinction and how we can try to bring nature back into balance It might be their large strangely human eyes or their dog like playfulness but seals have long captured people's interest and affection making them the perfect candidate for an environmental cause as well as the subject of decades of study Alix Morris spends a year with these magnetic creatures and brings them to life on the page season by season as she learns about their intelligence their relationships with each other their ecosystems and the changing climate Along with the enigmatic seals themselves Morris gets to know all of the competing interests in the intense debate about the newly recovered seal populations in our coastal waters from local fisherman whose catch is often diminished by savvy seals to tribes who once relied on seal hunting for food clothing and medicine to seal rescue workers and biologists to surfers and swimmers now encountering seal hunting sharks in coastal waters In a world where wildlife populations are disappearing at an alarming rate *A Year with the Seals* is a rare look at what happens when conservation efforts actually work and how human tampering with ecosystems continues to have unexpected consequences for a wide variety of species humans included

Exploding the Reading David Booth, 2014-11-05 One 200 year old folk tale 30 teachers and 1 000 students Ride along with literacy guru David Booth as he takes the same story to a wide variety of classrooms from kindergarten all the way through grade 12 and be amazed by the learning generated David argues that it takes two to read a book He reasons that sharing responses and bouncing ideas off others guides students to deeper thinking and challenges them to reconsider their views and increase their understanding

This intriguing book also shows teachers how to help students discover the world outside the text the origins connections place values and the different perceptions that readers have It illustrates ways to transpose that original text into other forms that let students look at the text with different eyes to ponder what might have been to challenge what they read and to add their new learning to the construct of the world Throughout the book authentic student samples and actual transcripts present students experiencing the featured story in a multitude of ways from poems and retellings to visuals and arts to conversation and blogs that will explode your definitions of comprehension response and engagement and have you looking at classroom literacy in a whole new way
