Braje, Torben C. Rick, 2011-03-23 For more than ten thousand years Native Americans from Alaska to southern California relied on aquatic animals such as seals sea lions and sea otters for food and raw materials Archaeological research on the interactions between people and these marine mammals has made great advances recently and provides a unique lens for understanding the human and ecological past Archaeological research is also emerging as a crucial source of information on contemporary environmental issues as we improve our understanding of the ancient abundance ecology and natural history of these species This groundbreaking interdisciplinary volume brings together archaeologists biologists and other scientists to consider how archaeology can inform the conservation and management of pinnipeds and other marine mammals along the Pacific Coast Mammalia Bannister.2024-02-19 Fishery Bulletin of the Fish and Wildlife Service ,1963 Mammals in the Seas Food and Agriculture Organization of the United Nations. Carnivore Behavior, Ecology, and Evolution John L. Gittleman, 2019-05-15 The mammalian order Martin, 1977 Carnivora is characterized by an incredible range of morphological ecological and behavioral variation Carnivores can be as small as the 100 gram least weasel or as large as the 800 kilogram polar bear Their reproductive rate can vary from one offspring every five years as with some black bears to three litters a year as with the dwarf mongoose Group sizes can be traced along a wide continuum from the solitary ermine to the monogamous golden jackal to the large extended packs of as many as 80 spotted hyenas Until recently the general habits of most wild carnivore species were inadequately understood In the last decade however improved technologies including the use of radiotelemetry and night vision scopes have led to many important discoveries This book is at once a critical summary and an evaluation of current research on carnivores A worthy successor to R F Ewer's monumental volume The Carnivores Cornell University Press it is the work of 30 leading carnivore biologists who here assemble comparative data on the basic anatomical behavioral ecological physiological reproductive and evolutionary characteristics of this group After a general introduction to the Carnivora the volume is divided in three parts each of which begins with a brief introduction outlining its main themes Part I Behavior covers acoustic and olfactory communication behavioral development behavioral ecology of canids and hyaenids modes of solitary living and group living In Part II Ecology topics include feeding ecology of the giant panda and Asiatic black bear adatpations for aquatic living ecological constraints on predation in felids consequences of small size in mustelids rate of basal metabolism and food habits
