Committee on Agriculture,1966      The Land-Grant Colleges and the Reshaping of American Higher Education Roger L. Geiger,Nathan M. Sorber,2013-03-01 This work provides a critical reexamination of the origin and development of America s land grant colleges and universities created by the most important piece of legislation in higher education The story is divided into five parts that provide closer examinations of representative developments Part I describes the connection between agricultural research and American colleges Part II shows that the responsibility of defining and implementing the land grant act fell to the states which produced a variety of institutions in the nineteenth century Part III details the first phase of the conflict during the latter decades of the nineteenth century about whether land colleges were intended to be agricultural colleges or full academic institutions Part IV focuses on the fact that full fledged universities became dominant institutions of American higher education The final part shows that the land grant mission is alive and well in university colleges of agriculture and in fact is inherent to their identity Including some of the best minds the field has to offer this volume follows in the fine tradition of past books in Transaction s Perspectives on the History of Higher Education series      **The Forging of Bureaucratic Autonomy** Daniel Carpenter,2001-09-09 Publisher Description      Hearings, Reports and Prints of the House Committee on Agriculture United States. High Plains Horticulture John F. Freeman,2008-11-30 High Plains Horticulture explores the significant civilizing role that horticulture has played in the development of farmsteads and rural and urban communities on the High Plains portions of Colorado Kansas Nebraska South Dakota and Wyoming drawing on both the science and the application of science practiced since 1840 Freeman explores early efforts to supplement native and imported foodstuffs state and local encouragement to plant trees the practice of horticulture at the Union Colony of Greeley the pioneering activities of economic botanists Charles Bessey in Nebraska and Aven Nelson in Wyoming and the shift from food production to community beautification as the High Plains were permanently settled and became more urbanized In approaching the history of horticulture from the perspective of local and unofficial history Freeman pays tribute to the tempered idealism learned pragmatism and perseverance of individuals from all walks of life seeking to create livable places out of the vast

Giesen,2012-08-01

Between the 1890s and the early 1920s the boll weevil slowly ate its way across the Cotton South from Texas to the Atlantic Ocean At the turn of the century some Texas counties were reporting crop losses of over 70 percent as were areas of Louisiana Arkansas and Mississippi By the time the boll weevil reached the limits of the cotton belt it had destroyed much of the region's chief cash crop tens of billions of pounds of cotton worth nearly a trillion dollars As staggering as these numbers may seem James C Giesen demonstrates that it was the very idea of the boll weevil and the struggle over its meanings that most profoundly changed the South as different groups from policymakers to blues singers projected onto this natural disaster the consequences they feared and the outcomes they sought Giesen asks how the myth of the boll weevil's lasting impact helped obscure the real problems of the region those caused not by insects but by landowning patterns antiquated credit systems white supremacist ideology and declining soil fertility *Boll Weevil Blues* brings together these cultural environmental and agricultural narratives in a novel and important way that allows us to reconsider the making of the modern American South
