This book presents personal narratives and collective ethnography of the emergence and development of Asian and Asian American women's scholarship in theology and religious studies. It demonstrates how the authors' religious scholarship is based on an embodied epistemology influenced by their social locations. Contributors reflect on their understanding of their identity and how this changed over time, the contribution of Asian and Asian American women to the scholarship work that they do, and their hopes for the future of their fields of study. The volume is multireligious and intergenerational and is divided into four parts: identities and intellectual journeys, expanding knowledge, integrating knowledge and practice, and dialogue across generations.
