## Searching For Alternatives:

**Searching Alternatives** M R Dixit, Siddarth Singh Bist, Sweety Shah, 2023-10-30 In the growth of societies business and entrepreneurship are regarded as two significant and determinative concerns Both notions in reality must be intertwined since they are the instruments for strengthening the stake on innovation creativity employment and economic growth As a result management and entrepreneurship education must be promoted and real life managerial entrepreneurial stories can serve as role models for young students in India The case study methodology is a significant pedagogy tool in the management education The book is an attempt to disseminate the innovative and practice based teaching material on management and entrepreneurship for higher education with a focus on real life contexts and practical learning The case studies in the book include a rich variety of managerial and entrepreneurial challenges that have to be understood and solved in the real world giving the student a dynamic experience on how to solve real world managerial and entrepreneurial challenges

**Shift!** Craig Elias, Tibor Shanto, 2010-06-25 There is a silver bullet in sales its called timing when you get to highly motivated decision makers at EXACTLY the right time after they experience a Trigger Event BUT before they call your competition When you have the right timing the sale almost happens by itself There are few challenges getting to the prospect understanding their dissatisfaction presenting a solution or closing the sale By luck or sheer numbers youve had timing happen before not its time to make it happen again and again and again simple but profound truths that will help you leverage intent for immediate action and cut down the selling cycle while creating lasting bonds with customers Stephen M R Covey author of the New York Times and 1 Wall Street Journal bestseller The Speed of Trust an entirely new perspective on things that are hiding in plain sight for all sales professionals Well done Kevin Fancey Senior Vice President of Sales Ricoh Canada Inc By combining the power of relationships with timing what Elias and Shanto call Trigger Events the authors present a powerful sales strategy Keith Ferrazzi 1 NYT Bestselling author of Who s Got Your Back and Never Eat Alone Elias and Shanto have brought referrals into the 21st Century showing you how to capitalize on the key moments that will bring you success in a busy fast paced world This is a must read Ivan Misner NY Times Bestselling author and Founder of BNI and the Referral Institute

*Spatial Search* Gunther Maier, 2012-12-06 Two areas have fascinated me for a long time One is the micro economic theory of consumer behavior the other one the role of space in economic processes Usually the two don t go together very well In more advanced versions of microeconomic consumer theory its economic actor may face uncertainty have to allocate resources over time or have to take into account the characteristics of products but rarely deals with space He she inhabits a spaceless point economy Regional Science on the other hand describes and analyzes the spatial structure and development of the economy but either ignores individual decision making altogether or treats it in a rather simplistic way In this book I try to bring together these two areas of interest of mine I do this by use of the microeconomic concept of search and placing it in an explicit spatial context The result in my opinion is a theoretical concept with fascinating

implications a broad set of potential implications and numerous interesting research questions After reading this book where I layout the basic idea of spatial search describe its elements and discuss some of its implications I hope the reader will share this opinion There are still plenty of unanswered research questions in this part of economic theory Hopefully this book will stimulate more work along these lines

**Federated Search** Milad Shokouhi,Luo Si,2011 Web search has significantly evolved in recent years For many years web search engines such as Google and Yahoo were only providing search service over text documents Aggregated search was one of the first steps to go beyond text search and was the beginning of a new era for information seeking and retrieval These days web search engines support aggregated search over a number of verticals and blend different types of documents e g images videos in their search results Moreover web search engines have started to crawl and search the hidden web Federated search federated information retrieval or distributed information retrieval has played a key role in providing the technology for aggregated search and crawling the hidden web The application of federated search is not limited to the web search engines There are many scenarios such as digital libraries in which information is distributed across different sources servers Peer to peer networks and personalized search are two examples in which federated search has been successfully used for searching multiple independent collections Federated Search provides a comprehensive summary of the research done to date looks at some of the challenges still to be faced and suggests some directions for future research on this important and current topic

**Searching the Grey Literature** Sarah Bonato,2018-06-13 Searching the Grey Literature is for librarians interested in learning more about grey literature If you have ever been asked for a grey literature search but didn t know where to start this book will help you craft your search successfully If you are an expert searcher but find that your library patrons are unfamiliar with the vast body of grey literature this book may be a useful teaching aid Those that are both new arrivals and established professionals in the field of librarianship will learn much about grey literature from reading this book and hopefully acquire new search skills and knowledge Although a wide range of different types of librarians or information professionals may find the content of this book useful those working in the areas of health or social science will benefit the most from the book s content Searching the Grey Literature discuss different aspects of grey literature including an introduction to grey literature the value of grey literature search sources for grey literature and how to conduct needs assessment before beginning a grey literature search Search techniques for identifying grey literature documents selecting and evaluating grey literature search sources and best searching practices are also discussed in detail

Business Charles Atkinson Kirkpatrick,Frederick A. Russ,1978-03

**Federated Search** Christopher N. Cox,2013-10-18 Understand federated searching implementation better and what works best in your library Federated Search Solution or Setback for Online Library Services is a comprehensive guide to choosing implementing testing teaching and marketing federated search products in libraries Experts in the field and librarians across the United States provide firsthand information on using federated search engines in different types of

libraries small academic and consortia integrating search engines into library Web sites homegrown upgrades bidding on a product other uses for software and the future of federated searching Federated Search Solution or Setback for Online Library Services explains what factors come into play when choosing which federated search engine is appropriate for a library This helpful resource discusses how to go out to bid for a product and provides a variety of case examples that illustrate implementation in libraries of different sizes The book also includes information of what happened once federated search was implemented on various campuses such as usability studies teaching issues getting buy on from librarians and marketing to students Topics discussed in Federated Search Solution or Setback for Online Library Services include implementing federated search in different types of libraries why some libraries choose NOT to implement federated searching usability testing of federated search product implementations teaching issues with federated search products marketing to library users integrating federated searching into library web sites and existing services homegrown federated search upgrades the future of federated searching in libraries Federated Search Solution or Setback for Online Library Services is an essential source on federated searching in libraries for librarians from any size or type of library

*Information Retrieval: SciFinder and SciFinder Scholar* Damon D. Ridley, 2002-04-29 Search effectively and efficiently with an understanding of the databases involved and the processes by which SciFinder searches This behind the scenes look at SciFinder summarizes the databases and explains how the user may creatively take advantage of the unique search opportunities provided **California. Supreme Court. Records and Briefs** California (State)., Court of Appeal Case s A054714 A054720 Number of Exhibits 2 Handbook of Computational Intelligence in Manufacturing and Production Management Laha, Dipak, Mandal, Purnendu, 2007-11-30 During the last two decades computer and information technologies have forced great changes in the ways businesses manage operations in meeting the desired quality of products and services customer demands competition and other challenges The Handbook of Computational Intelligence in Manufacturing and Production Management focuses on new developments in computational intelligence in areas such as forecasting scheduling production planning inventory control and aggregate planning among others This comprehensive collection of research provides cutting edge knowledge on information technology developments for both researchers and professionals in fields such as operations and production management Web engineering artificial intelligence and information resources management **Parallel Computing Technologies** Victor Malyskin, 2013-09-24 This book constitutes the proceedings of the 12th International Conference on Parallel Computing Technologies PaCT 2013 held in St Petersburg Russia during September 30 October 4 2013 The 41 full papers presented together with 2 invited papers were carefully reviewed and selected from 83 submissions The papers are organized in topical sections on all technological aspects of the applications of parallel computer systems High level parallel programming languages and systems methods and tools for parallel solution of large scale problems languages environments and software tools supporting parallel processing operating systems

scheduling mapping load balancing general architectural concepts cellular automata performance measurement and analysis tools teaching parallel processing software for grid and cloud computing scalable computing fragmentation and aggregation of algorithms and programs as well as programs assembling and reuse      *Environmental Conservation* Asish Ghosh,2008

State-Space Search Weixiong Zhang,2012-12-06 This book is about problem solving Specifically it is about heuristic state space search under branch and bound framework for solving combinatorial optimization problems The two central themes of this book are the average case complexity of heuristic state space search algorithms based on branch and bound and their applications to developing new problem solving methods and algorithms Heuristic state space search is one of the fundamental problem solving techniques in Computer Science and Operations Research and usually constitutes an important component of most intelligent problem solving systems The search algorithms considered in this book can be classified into the category of branch and bound Branch and bound is a general problem solving paradigm and is one of the best techniques for optimally solving computation intensive problems such as scheduling and planning The main search algorithms considered include best first search depth first branch and bound iterative deepening recursive best first search and space bounded best first search Best first search and depth first branch and bound are very well known and have been used extensively in Computer Science and Operations Research One important feature of depth first branch and bound is that it only requires space this is linear in the maximal search depth making it very often a favorable search algorithm over best first search in practice Iterative deepening and recursive best first search are the other two linear space search algorithms Iterative deepening is an important algorithm in Artificial Intelligence and plays an irreplaceable role in building a real time game playing program      Evaluating New Telecommunications Services Martin C.J. Elton,William A. Lucas,David W. Conrath,2012-12-06 This book contains the proceedings of the first international symposium devoted to research on the evaluation and planning of new person to person telecommunication systems It was sponsored by NATO's Special Programme Panel on Systems Science and took place in September 1977 at the University of Bergamo in the north of Italy Telecommunication systems which provide for communication between people rather than computers or other instruments are of two kinds There are mass communication systems broadcast radio and television and interpersonal systems for example the telephone and Telex which join together individuals or small groups Here we have included in the interpersonal category certain systems for retrieving information from computers essentially those systems in which the role of the computer is primarily to act as a store and to identify that information which best fits a user's request This excludes management information systems in which the computer performs important transformation functions Distinctions between interpersonal and mass communication systems and between these two and data communication systems are increasingly breaking down for those who provide the services In the U K broadcasters are piloting information retrieval services and the British Post Office is competing with a more sophisticated system which could also be used for the exchange of messages

Elsewhere computer data networks are increasingly employed for the exchange of personal messages 10th Symposium Construction Innovation and Global Competitiveness Ben Obinero Uwakwe, Isaam A. Minkarah, 2002-09-23 This two volume set comprises the proceedings of the 2002 symposium concerned with innovation in the construction industry and global competition Approximately 115 papers address topics ranging from business improvement to the impact of innovation on the built environment and globalization and competitiveness

**Selected Web Sites for Biomedical, Pharmaceutical, Veterinary and Animal Sciences**, 1999 *Similarity Search and Applications* Agma Juci Machado Traina, Caetano Traina Jr., Robson Leonardo Ferreira Cordeiro, 2014-10-08 This book constitutes the refereed proceedings of the 7th International Conference on Similarity Search and Applications SISAP 2014 held in A Coruña Spain in October 2014 The 21 full papers and 6 short papers presented were carefully reviewed and selected from 45 submissions The papers are organized in topical sections on Improving Similarity Search Methods and Techniques Indexing and Applications Metrics and Evaluation New Scenarios and Approaches Applications and Specific Domains

**On social and economic networks** Andrea Galeotti, 2005

**Handbook on Decision Support Systems 1** Frada Burstein, Clyde W. Holsapple, 2008-01-22 Decision support systems have experienced a marked increase in attention and importance over the past 25 years The aim of this book is to survey the decision support system DSS field covering both developed territory and emergent frontiers It will give the reader a clear understanding of fundamental DSS concepts methods technologies trends and issues It will serve as a basic reference work for DSS research practice and instruction To achieve these goals the book has been designed according to a ten part structure divided in two volumes with chapters authored by well known well versed scholars and practitioners from the DSS community

*The Oxford Handbook of Job Loss and Job Search* Ute-Christine Klehe PhD, Edwin van Hooft PhD, 2018-05-08 Job search is and always has been an integral part of people's working lives Whether one is brand new to the labor market or considered a mature experienced worker job seekers are regularly met with new challenges in a variety of organizational settings Edited by Ute Christine Klehe and Edwin A J van Hooft The Oxford Handbook of Job Loss and Job Search provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and job search Multidisciplinary in nature Klehe van Hooft and their contributing authors offer fascinating insight into the diverse theoretical and methodological perspectives from which job loss and job search have been studied such as psychology sociology labor studies and economics Discussing the antecedents and consequences of job loss as well as outside circumstances that may necessitate a more rigorous job hunt this Handbook presents in depth and up to date knowledge on the methods and processes of this important time in one's life Further it examines the unique circumstances faced by different populations during their job search such as those working job to job the unemployed mature job seekers international job seekers and temporary employed workers Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes As a result this Handbook concludes with a discussion of the various types of

interventions developed to aid the unemployed Further it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss unemployment career transitions outplacement and job search
