Seasons End Season Of The Vigilante:

It's Not TV Felix Gillette, John Koblin, 2022-11-01 A read so riveting it's not hard to imagine watching it unfold on Sunday nights. The Associated Press. An incisive account that is more than a rosy victory lap for one of TV's most influential channels. Eric Deggans. NPR's Books We Love. It's Not TV proves to be a lively companion to all these shows. Andrew O'Hagan. The New York Review of Books. The inside story of HBO, the start-up company that reinvented television by two veteran media reporters. HBO changed how stories could be told on TV. The Sopranos, Sex and the City, The Wire, Game of Thrones. The network's meteoric rise heralded the second golden age of television with serialized shows that examined and reflected American anxieties, fears, and secret passions through complicated characters who were flawed and often unlikable. HBO's own behind-the-scenes story is as complex, compelling, and innovative as the dramas the network created, driven by unorthodox executives who pushed the boundaries of what viewers understood as television at the turn of the century. Originally conceived by a small upstart group of entrepreneurs to bring Hollywood movies into living rooms across America, the scrappy network grew into one of the most influential and respected players in Hollywood. It's Not TV is the deeply reported, definitive story of one of America's most daring and popular cultural institutions, laying bare HBO's growth, dominance, and vulnerability within the capricious media landscape over the past fifty years. Through the visionary executives, showrunners, and producers who shaped HBO, seasoned journalists Gillette and Koblin bring to life a dynamic cast of characters who drove the company's creative innovation in astonishing ways, outmaneuvering copycat competitors, taming Hollywood studios, transforming 1980s comedians and athletes like Chris Rock and Mike Tyson into superstars, and in the late 1990s and 2000s elevating the commercial-free serialized drama to a revered art form. But in the midst of all its success, HBO was also defined by misbehaving executives, internal power struggles, and a few crucial miscalculations. As data-driven models like Netflix have taken over streaming, HBO's artful, instinctual, and humanistic approach to storytelling is in jeopardy. Taking readers into the boardrooms and behind the camera, It's Not TV tells the surprising, fascinating story of HBO's ascent, its groundbreaking influence on American business, technology, and popular culture, and its increasingly precarious position in the very market it created.

Tropical Fire Ecology Mark Cochrane, 2010-04-11 The tropics are home to most of the world's biodiversity and are currently the frontier for human settlement. Tropical ecosystems are being converted to agricultural and other land uses at unprecedented rates. Land conversion and maintenance almost always rely on fire, and because of this, fire is now more prevalent in the tropics than anywhere else on Earth. Despite pervasive fire, human settlement, and threatened biodiversity, there is little comprehensive information available on fire and its effects in tropical ecosystems. Tropical deforestation, especially in rainforests, has been widely documented for many years. Forests are cut down and allowed to dry before being burned to remove biomass and release nutrients to grow crops. However, fires do not always stop at the borders of cleared forests. Tremendously damaging fires are increasingly spreading into forests that were never

evolutionarily prepared for wild fires The largest fires on the planet in recent decades have occurred in tropical forests and burned millions of hectares in several countries The numerous ecosystems of the tropics have differing levels of fire resistance resilience or dependence At present there is little appreciation of the seriousness of the wild fire situation in tropical rainforests but there is even less understanding of the role that fire plays in the ecology of many fire adapted tropical ecosystems such as savannas grasslands and other forest types

Television Finales Douglas L. Howard, David Bianculli, 2018-11-13 Today more than ever series finales have become cultural touchstones that feed watercooler fodder and Twitter storms among a committed community of viewers While the final episodes of *The Fugitive* and *M A S H* continue to rank among the highest rated broadcasts more recent shows draw legions of binge watching fans Given the importance of finales to viewers and critics alike Howard and Bianculli along with the other contributors explore these endings and what they mean to the audience both in terms of their sense of narrative and as episodes that epitomize an entire show Bringing together a veritable who's who of television scholars journalists and media experts including Robert Thompson Martha Nochimson Gary Edgerton David Hinckley Kim Akass and Joanne Morreale the book offers commentary on some of the most compelling and often controversial final episodes in television history Each chapter is devoted to a separate finale providing readers with a comprehensive survey of these watershed moments Gathering a unique international lineup of journalists and media scholars the book also offers readers an intriguing variety of critical voices and perspectives

Birth of the Binge Dennis Broe, 2019-03-04 A deep dive into the practice and execution of contemporary television viewing. *Birth of the Binge: Serial TV and the End of Leisure* describes and details serial television and binge watching, the exceedingly popular form of contemporary television viewing that has come to dominance over the past decade. Author Dennis Broe looks at this practice of media consumption by suggesting that the history of seriality itself is a continual battleground between a more unified version of truth telling and a more fractured form of diversion and addiction. Serial television is examined for the ways its elements—multiple characters, defined social location, and season and series arcs—are used alternately to illustrate a totality or to fragment social meaning. Broe follows his theoretical points with detailed illustrations and readings of several TV series in a variety of genres, including the systemization of work in *Big Bang Theory* and *Silicon Valley*, the social imbrications of *Justified*, and the contesting of masculinity in Joss Whedon's *Buffy the Vampire Slayer*, *Firefly*, and *Dollhouse*. In this monograph, Broe uses the work of Bernard Stiegler to relate the growth of digital media to a new phase of capitalism called hyperindustrialism, analyzing the show *Lost* as suggestive of the potential as well as the poverty and limitations of digital life. The author questions whether, in terms of mode of delivery, commercial studio structure and narrative patterns, viewers are experiencing an entirely new moment or a hyperextension of the earlier network era. *The Office*, *The Larry Sanders Show*, and *Orange Is the New Black* are examined as examples of, respectively, network, cable, and online series with structure that is more consistent than disruptive. Finally, Broe examines three series by J. J. Abrams: *Revolution*, *Believe*, and *11.22.63*, which employ the techniques and devices of serial television to criticize a rightward neo-conservative drift in the American empire, noting that none of the series were able to endure in an increasingly conservative climate. The book also functions as a reference work, featuring an appendix of 100 Seminal Serial Series and a supplementary index that television fans and media students and scholars will utilize in and out of the classroom.
