Shaping the American Character: The Significance of the Frontier in American History Frederick Jackson Turner, 2012-01-10 More than a hundred years after it was first articulated Frederick Jackson Turner s frontier thesis remains one of the key interpretations of American history Turner argued that the European heritage of Americans was less important in understanding the country they had made than their own experience in settling a continent It was the circumstances of life on the frontier in fact a succession of frontiers that moved inexorably westward that were a determining influence on American character and institutions Turner read this paper propounding his thesis at the meeting of the American Historical Association in Chicago July 12 1893 as part of the World s Columbian Exposition It was timely he suggested because the Census of 1890 had announced the closing of the frontier in the United States and thus the end of an important stage of American development

Sea of Grass Dave Hage, Josephine Marcotty, 2025-05-27 A vivid portrait of the American prairie which rivals the rainforest in its biological diversity and with little notice is disappearing even faster This book describes in loving living prose one of the world s greatest and most important landscapes And it does so while there s still time to save some serious part of it Bill McKibben author of *The End of Nature* The North American prairie is an ecological marvel a lush carpet of grass that stretches to the horizon and home to some of the nation s most iconic creatures bison elk wolves pronghorn prairie dogs and bald eagles Plants microbes and animals together made the grasslands one of the richest ecosystems on Earth and a massive carbon sink but the constant expansion of agriculture threatens what remains When European settlers encountered the prairie nearly two hundred years ago rather than a natural wonder they saw an alien and forbidding place But with the steel plow artificial drainage and fertilizers they converted the prairie into some of the world s most productive farmland a transformation unprecedented in human history American farmers fed the industrial revolution and made North America a global breadbasket but at a terrible cost the forced dislocation of Indigenous peoples pollution of great rivers and catastrophic loss of wildlife Today industrial agriculture continues its assault on the prairie plowing up one million acres of grassland a year Farmers can protect this extraordinary landscape but trying new ideas can mean ruin in a business with razor thin margins and will require help from Washington D C and from consumers Veteran journalists and midwesterners Dave Hage and Josephine Marcotty reveal humanity s relationship with this incredible land offering a deep compassionate analysis of the difficult decisions as well as opportunities facing agricultural and Indigenous communities *Sea of Grass* is a vivid portrait of a miraculous ecosystem that makes clear why the future of this region is of essential concern far beyond the heartland

Seeking Transcendence Joseph C. Manzella, 2025-06-23 *Seeking Transcendence* examines the various paths taken by those who have detached themselves from their traditional institutional religious roots but are seeking non traditional paths to spiritual experiences Called the nones or non affiliated in popular mass media these include a significant number of Western folks who maintain a belief in God or at least consider themselves spiritual but not religious Each chapter of the book explores these trends with a specific theme as well as a case study based on the author s ethnographic

observation of alternative spiritual communities and practices in North America and Western Europe Ultimately this book shows how contemporary alternatives to traditional institutional religion appeal to nones presenting the relevance of new religious movements and more secular spiritual paths to transcendence
