Work,2018-07-18 Grape wine has been produced for at least 4 000 years having been aged stored and transported in every conceivable type of vessel Its seductiveness has been enhanced by this packaging primarily three strikingly different containers amphorae wooden barrels and glass bottles

Henry H Work brings extensive wine experience as a cooper working with wine barrels and living in California's Napa Valley to provide a richly detailed and vivid account of wine containers through the ages. This book delves into the history, evolution, and present use of containers, vessels, and stoppers from animal skin sacks to barrels from glass bottles to upstart packaging such as wine casks and even aluminium cans. It considers the advantages and weaknesses of their construction, designs, and labels, methods of shipment and storage, as well as their impact on marketing wine to customers. This is an enlightening and innovative read which draws on the most current archaeological research, scientific data, and wine business trends. It is richly peppered throughout with the author's own visits to many of the locations explored in the book, bringing history to life. This book will appeal to individuals within the wine industry, undergraduates in the fields of history, archaeology, food, and hospitality, as well as all people interested in wine.

In Vitro Fertilization Zsolt Peter Nagy, Alex C. Varghese, Ashok Agarwal, 2019-07-03. Now in its revised and expanded second edition, including over 20 new chapters, this comprehensive textbook remains a unique and accessible description of the current and developing diagnostic and treatment techniques and technologies comprising in vitro fertilization (IVF). Arranged thematically in sections, each chapter covers a key topic in IVF in a sensible presentation. Parts one and two describe the planning, design, and organization of an ART unit and IVF laboratory and equipment and systems, respectively. The sections that follow provide detailed descriptions of IVF techniques, embryo culture methods, sperm processing and selection, insemination procedures, micromanipulation, embryo evaluation, cryopreservation, and embryo transfer. Concluding sections address issues of management and regulation of ART labs across the globe, as well as special topics and emerging techniques and devices. Chapter authors, all experts in the field, contribute their expertise from around the world. With the addition of learning key points and review questions at the beginning and end of each chapter, this new edition of *In Vitro Fertilization* is a readily accessible, high-quality instructional resource for reproductive medicine trainees at all levels. Practicing reproductive endocrinologists, urologists, and embryologists also will find value in the book, as will infertility researchers.
