Shared Beginnings, Divergent Lives John H. LAUB, Robert J. Sampson, 2009-06-30 This book analyzes newly collected data on crime and social development up to age 70 for 500 men who were remanded to reform school in the 1940s Born in Boston in the late 1920s and early 1930s these men were the subjects of the classic study Unraveling Juvenile Delinquency by Sheldon and Eleanor Glueck 1950 Updating their lives at the close of the twentieth century and connecting their adult experiences to childhood this book is arguably the longest longitudinal study of age crime and the life course to date John Laub and Robert Sampson's long term data combined with in depth interviews defy the conventional wisdom that links individual traits such as poor verbal skills limited self control and difficult temperament to long term trajectories of offending The authors reject the idea of categorizing offenders to reveal etiologies of offending rather they connect variability in behavior to social context They find that men who desisted from crime were rooted in structural routines and had strong social ties to family and community By uniting life history narratives with rigorous data analysis the authors shed new light on long term trajectories of crime and current policies of crime control Table of Contents Acknowledgments 1 Diverging Pathways of Troubled Boys 2 Persistence or Desistance 3 Explaining the Life Course of Crime 4 Finding the Men 5 Long Term Trajectories of Crime 6 Why Some Offenders Stop 7 Why Some Offenders Persist 8 Zigzag Criminal Careers 9 Modeling Change in Crime 10 Rethinking Lives in and out of Crime Notes References Index The accounts of individuals are guite riveting and the book can be recommended strongly purely for the stories provided about diverse lives However the book is much much more than that in terms of the serious challenge that the authors findings and ideas present to some of the leading contemporary theories of both crime and development A highly original and scholarly contribution of the highest quality Sir Michael Rutter Institute of Psychiatry King s College London ttitleShared Beginnings Divergent Lives is an extraordinary work which shows the deep insights gained by studying the whole life course beginning in childhood and ending in later life With access to a rare data archive the authors provide compelling evidence on the remarkably varied adult lives of teenage delinquents who grew up in low income areas of Boston born 1925 1935 The story behind these varied life paths and their consequences inspires fresh thinking about crime over the life course through models of life trajectories and vivid narratives that reveal the complexity of lives Glen H Elder Jr University of North Carolina at Chapel Hill This book redraws the landscape of developmental criminology that Laub and Sampson already have done so much to define setting new standards and benchmarks along the way The authors both provide new evidence for earlier conclusions and challenge prevailing assumptions and assertions thereby reshaping the criminological research agenda for years to come John Hagan Northwestern University Shared Beginnings, Divergent Lives John H. Laub, Robert J. Sampson, 2006-03-31 This book analyzes newly collected data on crime and social development up to age 70 for 500 men who were remanded to reform school in the 1940s Born in Boston in the late 1920s and early 1930s these men were the subjects of the classic study

Unraveling Juvenile Delinquency by Sheldon and Eleanor Glueck 1950 Updating their lives at the close of the twentieth century and connecting their adult experiences to childhood this book is arguably the longest longitudinal study of age crime and the life course to date John Laub and Robert Sampson's long term data combined with in depth interviews defy the conventional wisdom that links individual traits such as poor verbal skills limited self control and difficult temperament to long term trajectories of offending The authors reject the idea of categorizing offenders to reveal etiologies of offending rather they connect variability in behavior to social context They find that men who desisted from crime were rooted in structural routines and had strong social ties to family and community By uniting life history narratives with rigorous data analysis the authors shed new light on long term trajectories of crime and current policies of crime control

Criminal Theory Profiles Joshua D. Behl, Leonard A. Steverson, 2021-09-23 This book brings to life the major theories of crime and deviance by presenting detailed profiles that help readers differentiate each theory and its major propositions by better understanding how when and by whom the theory was formed Criminology is based on strong theoretical foundations that attempt to answer the guestion of why people commit crime Criminological theory is especially complex in that theorists come from a variety of disciplines including medicine sociology psychology economics and law While not an exhaustive list of each theorist's works nor an in depth review of the empirical work that has been done on each theory this text tracks the intellectual development of a theory by profiling the theorists who are responsible for the major ideas in criminological thought By viewing the field in the context of the social conditions of the time and the personal histories of the theorists students can better understand the intellectual history of each theory and the relationship between criminology and other fields to grasp a better appreciation of how the science of crime and the study of criminals has evolved All chapters are organized with a brief overview of the theorist and their significant ideas a biographical profile of the theorist coverage of the theoretical developments and contributions of the theorist a list of major works by the theorist and a summary detailing the overall legacy of the theorist in the field This book is ideal for courses on criminology criminological theory and criminal behavior **Confirmation Hearings on Federal Appointments** United States. Congress. Senate. Committee on the Desistance from Sex Offending D. Richard Laws, Tony Ward, 2011-03-11 This book offers a fresh Judiciary, 2010 perspective on treating a population that is often demonized by policymakers the public and even clinicians The authors argue that most sex offenders are people like us with the potential to lead meaningful law abiding lives if given a chance and appropriate support They describe an empirically and theoretically grounded rehabilitation approach the Good Lives Model which can be integrated with the assessment and intervention approaches that clinicians already use Drawing on the latest

knowledge about factors promoting desistance from crime the book discusses how encouraging naturally occurring desistance processes and directly addressing barriers to community reintegration can make treatment more effective and long lasting **Effective Interventions for Children in Need** Barbara Maughan,2017-03-02 This book sets out the current state of knowledge about what works in reducing impairments to children s health and development Little and Maughan s book applies a high standard of proof and reproduces only the work of the leading intervention scientists from around the world After discussing the real world challenges to more effective children s services the book goes on to cover policy and practice proven to change the lives of all children and extends also to effective programmes targeted at children with specific disorders Examples include changes in household income early years support moving families to less disadvantaged communities improving parenting and using schools to better mental health The benefits of evidence based programmes are specified as are the costs to society of not intervening The evidence is used to make recommendations about getting effective policy and practice into routine use and includes illustrations of successful applications of these ideas

Female Delinquency From Childhood To Young Adulthood Rolf Loeber, Wesley G. Jennings, Lia Ahonen, Alex R. Piguero, David P. Farrington, 2016-11-23 This Brief fills a gap in criminological literature as there are few empirically based studies on delinquency of adolescent girls It provides results of a longitudinal study The Pittsburgh Girls Study PGS which includes 2 451 girls followed annually from age 10 19 the ages when criminal behavior tends to emerge This study provides the most extensive and comprehensive investigation into the criminal offending and self reported trajectories of offending of PGS participants along with an in depth examination of other criminal career dimensions. In five chapters this short volume reviews the limited extent of girls delinquency literature presents data on girls offending patterns onset persistence specialization and desistence provides insights on gender differences by comparison with the Pittsburgh Youth Study which focused on male offenders and explores the theoretical and practical implications of the results By understanding the origins and onset of criminal behavior in girls researchers can begin to understand effective interventions and crime prevention This Brief will be of interest to researchers in criminology and criminal justice as well as related fields such as sociology public policy and psychology Controlling Crime Philip J. Cook, Jens Ludwig, Justin McCrary, 2011-08-22 Criminal justice expenditures have more than doubled since the 1980s dramatically increasing costs to the public With state and local revenue shortfalls resulting from the recent recession the question of whether crime control can be accomplished either with fewer resources or by investing those resources in areas other than the criminal justice system is all the more relevant Controlling Crime considers alternative ways to reduce crime that do not sacrifice public safety Among the topics considered here are criminal justice system reform social policy and government policies affecting alcohol abuse drugs and private crime prevention Particular attention is paid to the respective roles of both the private sector and government agencies Through a broad conceptual framework and a careful review of the relevant literature this volume provides insight into the important

trends and patterns of some of the interventions that may be effective in reducing crime

Global Perspectives on Desistance Joanna Shapland, Stephen Farrall, Anthony Bottoms, 2016-03-31 In recent years attention has switched from how adolescents are attracted into crime to how adults reduce their offending and then stop the process of desistance There are now around a dozen major longitudinal and in depth studies around the world which have followed or are following offenders over their life course charting their offending history and their social and economic circumstances The book is the first to offer a global perspective on desistance and brings together international leading experts in the field from countries including the UK Ireland the Netherlands Scandinavia Spain the USA and Australia to set out what we know about desistance and to advance our theoretical understanding Drawing on leading studies this book sets the academic agenda for future work on desistance and examines the implications and potential positive effects of this research on desistance processes among current offenders Global Perspectives on Desistance is divided into three sections Agency structure and desistance from crime Life phases and desistance Criminal justice and state interventions Comprehensive and forward thinking this book is ideal for students studying criminology probation and social work social policy sociology and psychology It is also essential reading for academic criminologists sociologists and policy makers and practitioners working in corrections and reform The Origins of American Criminology Francis T. Cullen, Cheryl Lero Jonson, Andrew J. Myer, Freda Adler, 2011 The essays contained in this book capture the stories behind the invention of criminology s major theoretical perspectives and preserves information from the generation that defined the field for the past decades that otherwise would have been lost This history shows criminology to be a human enterprise Its ideas were not driven primarily by data nor were the theories invented solely as part of the scientific process To the contrary American criminology s great theories most often preceded the collection of data they guided and produced empirical inquiry not vice versa This volume demonstrates that humanity is what makes theory possible in that diverse experiences allow individual scholars to see the world differently and thus shape theoretical paradigms based on their own unique life stories The Oxford Handbook of Developmental and Life-course Criminology David P. Farrington, Lila Kazemian, Alexis Russell

Piquero, 2019 The Oxford Handbook on Developmental and Life Course Criminology offers the first comprehensive look at these two approaches Edited by noted authorities in the field the Handbook aims to be the most authoritative resource on all issues germane to developmental and life course criminologists from the world's leading scholars The Nurture Versus Biosocial Debate in Criminology Kevin M.
